ISO/IEC 23531:2020 (E)

Systems and software engineering — Capabilities of issue management tools

Contents

Foreword

Introduction

1 Scope

2 Normative reference

3 Terms and definitions

4 Object model for issue management tools

- 4.1 Overview of issue management
- 4.2 Use case of issue management
- 4.2.1 Use case
- 4.2.2 Use case scenarios
- 4.2.2.1 Use case scenario of work management in system development process
- 4.2.2.2 Use case scenario of defect management in testing process
- 4.2.2.3 Use case scenario of incident management in a system under operation
- 4.3 Object model of issue management entity
- 4.3.1 General
- 4.3.2 Common entities
- 4.3.3 Work Management entities
- 4.3.4 Defect Management entities
- 4.3.5 IT Service Management entities
- 4.4 Categories of capability of issue management tool

5 Category of issue management entity

- 5.1 Overview
- 5.2 Common entities
- 5.3 Work Management entities
- 5.4 Defect Management entities
- 5.5 IT Service Management entities
- 5.6 Summary of issue management entities

6 Capabilities of issue management tools

- 6.1 Overview
- 6.2 Common capabilities
- 6.3 Work management capabilities
- 6.4 Defect management capabilities
- 6.5 IT service management capabilities
- 6.6 Summary of capabilities

Annex A (informative) How to use this document with ISO/IEC 20741

Annex B (informative) Overview of the approach for this document
