ISO/IEC 15938-16:2021 (E)

Information technology — Multimedia content description interface — Part 16: Conformance and reference software for compact descriptors for video analysis

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Abbreviated terms, relational operators, bitwise operators and functions

5 Conformance testing

- 5.1 Conformance video dataset and reference bitstreams
- 5.2 Conformance test conditions for strict conformance
- 5.2.1 Test setup
- 5.2.2 Test conditions
- 5.2.3 Global descriptor test
- 5.2.4 Local descriptor test
- 5.2.5 Deep feature descriptor test with default NN
- 5.2.6 Combined global and local descriptor test
- 5.2.7 Combined global and deep feature descriptor test with default NN
- 5.3 Conformance test conditions using custom NN

6 Reference software

- 6.1 Reference software location
- 6.2 Reference software licence
- 6.3 Reference software documentation
- 6.4 Reference software installation and compilation
- 6.5 Reference software architecture
- 6.5.1 General
- 6.5.2 Extraction
- 6.5.3 Pairwise matching
- 6.5.4 Retrieval
- 6.5.5 Parameters
- 6.5.6 Implementation details for CDVA reference software
- 6.5.7 Usage
- 6.5.7.1 General
- 6.5.7.2 Extraction arguments
- 6.5.7.3 Matching arguments
- 6.5.7.4 Retrieval arguments

Annex A (informative) Deployment of the reference software using Docker containers
