

# ISO/IEC 21823-3:2021-09 (E)

## Internet of things (IoT) - Interoperability for IoT systems - Part 3: Semantic interoperability

---

Contents	Page
FOREWORD .....	4
INTRODUCTION.....	5
1 Scope.....	8
2 Normative references .....	8
3 Terms and definitions .....	8
4 Abbreviated terms .....	9
5 IoT semantic interoperability process.....	9
5.1 Overview.....	9
5.2 IoT semantic interoperability process requirements.....	10
5.3 IoT semantic interoperability models .....	11
5.4 IoT semantic interoperability guidelines .....	13
5.4.1 Guidelines on the capture of semantic meaning .....	13
5.4.2 Guidelines on the integration of semantic interoperability capability .....	14
5.4.3 Guidelines on the support of semantic interoperability engineering .....	15
6 IoT semantic interoperability life cycle .....	19
6.1 Life cycle requirements .....	19
6.2 Life cycle model .....	22
6.3 Life cycle implementation guidelines .....	23
6.3.1 Guidelines on ontology life cycle.....	23
6.3.2 Guidelines on semantic interoperability life cycle .....	23
6.3.3 Guidelines on IoT system life cycle.....	24
Annex A (informative) Guidance on how to learn IoT semantic interoperability .....	26
Annex B (informative) Guidance on how to develop IoT semantic interoperability.....	29
B.1 Developing semantic interoperability capabilities .....	29
B.2 Building steps .....	29
Annex C (informative) Guidance on how to manage IoT semantic interoperability life cycle.....	31
C.1 Interoperability specification life cycle that supports ontologies.....	31
C.2 IoT system life cycle supporting interoperability .....	32
Annex D (informative) Ontological specification of the IoT Reference Architecture .....	33
D.1 General.....	33
D.2 Service, network, IoT device and IoT gateway .....	33
D.3 IoT-User .....	34
D.4 Virtual entity, physical entity and IoT device.....	35
D.5 Domain-based Reference Model (RM).....	35
Annex E (informative) Related existing ontologies .....	37
E.1 W3C Semantic Sensor Network ontology .....	37
E.2 IoT-Lite .....	37
E.3 Open Connectivity Foundation (OCF) ontology .....	37
E.4 ETSI Smart Applications REFerence ontology.....	41
E.5 oneM2M Base Ontology .....	42
E.6 Sensor Model Language (SensorML) .....	42
E.7 IoT-O .....	43
E.8 IoT ontology unification approach .....	43
Bibliography.....	45

Figure 1 – Semantic interoperability facet for IoT .....	5
Figure 2 – Using metadata in semantic interoperability .....	6
Figure 3 – Meaningfulness of the data, described with metadata.....	6
Figure 4 – Objective of semantic interoperability standard .....	9
Figure 5 – IoT semantic interoperability process model.....	11
Figure 6 – Semantic information usage model.....	12
Figure 7 – Example of structured knowledge representation .....	13
Figure 8 – Example of semantic information usage for a temperature sensor .....	15
Figure 9 – Example of ontology mapping .....	17
Figure 10 – Example of ontology alignment.....	18
Figure 11 – Example of ontology merging .....	18
Figure 12 – Example of ontology integration .....	19
Figure 13 – Example of modular design .....	22
Figure 14 – Example of interoperability maturity evaluation result.....	22
Figure 15 – Semantic interoperability life cycle model.....	23
Figure 16 – Example of ontology life cycle model.....	23
Figure 17 – Example of interoperability specification life cycle .....	24
Figure D.1 – IoT entity .....	33
Figure D.2 – Service, network, IoT device and IoT gateway .....	34
Figure D.3 – IoT-User .....	34
Figure D.4 – Virtual entity, physical entity, and IoT device .....	35
Figure D.5 – Domain-based Reference Model .....	36
Figure E.1 – Architecture – concepts .....	38
Figure E.2 – Communication layering model .....	38
Figure E.3 – oneloTa .....	39
Figure E.4 – OCF ontology .....	40
Figure E.5 – SAREF and its extensions .....	41
Figure E.6 – Overview of the SAREF ontology .....	42
Table 1 – IoT semantic interoperability process requirements .....	10
Table 2 – Llife cycle requirements.....	20
Table A.1 – Syllabus example on IoT semantic interoperability practice .....	26
Table A.2 – Course content for semantic interoperability practice .....	27
Table B.1 – Building steps for IoT semantic interoperability .....	30
Table C.1 – Example of interoperability specification life cycle.....	31
Table C.2 – Example of IoT system life cycle .....	32
