ISO/IEC 21472:2021-10 (E)

Information technology - Scenario evaluation methodology for user interaction influence in biometric system performance

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Conformance 2

5 Overview 2
5.1 General 2
5.2 User interaction influence factors 3

6 Evaluation conditions specification 4
6.1 General 4
6.2 Specification of user interaction influence factors 4
6.2.1 General 4
6.2.2 Factors depending on the biometric system 4
6.2.3 Factors depending on the user 4
6.2.4 Factors depending on the user-biometric system interaction 6
6.3 Specification of the evaluation conditions 7
6.3.1 General 7
6.3.2 Specification of reference evaluation conditions (REC) 8
6.3.3 Specification of target evaluation conditions (TEC) 8
6.3.4 Enrolment-related considerations in REC / TEC 8
6.3.5 Recognition-related considerations in REC / TEC 8
6.4 Generation of the evaluation conditions 9
6.5 Control of the evaluation conditions 9

7 Requirements for planning a user interaction influence testing of biometric systems 9
7.1 Test specification 9
7.2 Test information 10
7.3 Test instructions 10
7.4 Testing order of evaluation conditions 10
7.5 Test results 11

Annex A (normative) Requirements for testing and reporting user interaction influence of biometric systems -- Best practices 12
