ISO/IEC 30169:2022-05 (E)

Internet of Things (IoT) - IoT applicatio ns for electronic label system (ELS)

Contents

Page

FOREWORD 4
INTRODUCTION 5
1 Scope 6
2 Normative references 6
3 Terms and definitions 6
4 Abbreviated terms 7
5 Motivation 7
5.1 Background 7
5.2 Purpose and significance 8
6 System framework and IoT application model 8
6.1 General 8
6.2 System framework 8
6.3 IoT application model 9
6.3.1 General 9
6.3.2 User 9
6.3.3 ELS backend system 10
6.3.4 Database 11
6.3.5 IoT gateway 11
6.3.6 ELs 12
6.3.7 Perception objects 12
7 General technical requirements 12
7.1 General 12
7.2 Function requirements 12
7.2.1 ELS backend system 12
7.2.2 Database 14
7.2.3 IoT gateway 14
7.2.4 ELs 14
7.3 Interface requirements 15
7.3.1 ELS backend system 15
7.3.2 Database 15
7.3.3 IoT gateway 16
7.3.4 ELs 16
7.3.5 System scalability 16
7.4 Performance requirements 16
7.4.1 ELS backend system 16
7.4.2 Database 16
7.4.3 IoT gateway 17
7.4.4 ELs 17
Annex A (normative) Reference testing requirements 19
A.1 General 19
A.2 Mechanical testing of display devices 19
A.3 System performance testing 19

Annex B (informative) Application scenarios, and use cases of ELS 20
B.1 Application scenarios 20
B.1.1 Consumer-oriented representation of merchandise information 20
B.1.2 Staff-oriented representation of merchandise management information 20
B.1.3 P2P delivery and self pick-up oriented merchandise collection 21
B.2 Use cases 21
B.2.1 Grocery store 21
B.2.2 Cosmetics shop 21
B.2.3 Fashion shop 21
B.2.4 Industry factory 22
Bibliography 23

Figure 1 – System framework of the IoT applications for ELS 8
Figure 2 – IoT application model of the IoT applications for ELS 9
