

# ISO/IEC 30169:2022-05 (E)

## Internet of Things (IoT) - IoT applications for electronic label system (ELS)

---

Contents	Page
FOREWORD.....	4
INTRODUCTION.....	5
1 Scope.....	6
2 Normative references .....	6
3 Terms and definitions .....	6
4 Abbreviated terms .....	7
5 Motivation.....	7
5.1 Background.....	7
5.2 Purpose and significance .....	8
6 System framework and IoT application model .....	8
6.1 General.....	8
6.2 System framework .....	8
6.3 IoT application model.....	9
6.3.1 General .....	9
6.3.2 User .....	9
6.3.3 ELS backend system .....	10
6.3.4 Database.....	11
6.3.5 IoT gateway.....	11
6.3.6 ELs.....	12
6.3.7 Perception objects .....	12
7 General technical requirements .....	12
7.1 General.....	12
7.2 Function requirements .....	12
7.2.1 ELS backend system .....	12
7.2.2 Database.....	14
7.2.3 IoT gateway.....	14
7.2.4 ELs.....	14
7.3 Interface requirements .....	15
7.3.1 ELS backend system .....	15
7.3.2 Database.....	15
7.3.3 IoT gateway.....	16
7.3.4 ELs.....	16
7.3.5 System scalability .....	16
7.4 Performance requirements.....	16
7.4.1 ELS backend system .....	16
7.4.2 Database.....	16
7.4.3 IoT gateway.....	17
7.4.4 ELs.....	17
Annex A (normative) Reference testing requirements.....	19
A.1 General.....	19
A.2 Mechanical testing of display devices .....	19
A.3 System performance testing.....	19

Annex B (informative) Application scenarios, and use cases of ELS.....	20
B.1 Application scenarios .....	20
B.1.1 Consumer-oriented representation of merchandise information.....	20
B.1.2 Staff-oriented representation of merchandise management information .....	20
B.1.3 P2P delivery and self pick-up oriented merchandise collection.....	21
B.2 Use cases.....	21
B.2.1 Grocery store.....	21
B.2.2 Cosmetics shop .....	21
B.2.3 Fashion shop.....	21
B.2.4 Industry factory.....	22
Bibliography.....	23
Figure 1 – System framework of the IoT applications for ELS.....	8
Figure 2 – IoT application model of the IoT applications for ELS .....	9
