

ISO/IEC 24039:2022-06 (E)

Information technology - Smart city digital platform reference architecture - Data and service

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Overview	2
5	Design principles	3
6	Reference architecture	4
7	Technical support	5
7.1	Data collection	5
7.2	Data processing	6
7.3	Data storage	6
7.4	Development and testing	7
7.5	Operating tool	7
7.5.1	Life cycle management	7
7.5.2	System operation	7
8	Resource management	8
8.1	Data governance	8
8.1.1	Data ownership identification	8
8.1.2	Metadata management	8
8.1.3	Data quality	9
8.1.4	Data policy	9
8.2	Data assets management	9
8.2.1	Data asset identification and registration	9
8.2.2	Data asset directory and catalogue management	10
8.2.3	Data asset model	10
8.2.4	Data asset association	10
8.2.5	Data asset security	10
8.3	Data intelligence	11
8.3.1	Data training	11
8.3.2	Data analysis	11
8.3.3	Data visualization	12
8.4	Service decoupling	12
8.5	Domain model	12
8.5.1	Domain knowledge	12
8.5.2	Domain business logic	12
8.6	Service extraction	13
9	Capability exposure	13
9.1	Data service	13
9.2	Data operation	13
9.2.1	Authorization	13
9.2.2	Circulation	14
9.3	Data portal	14
9.4	Service integration	14
9.4.1	Service interaction	14

	9.4.2	Service encapsulation	15
9.5		Service delivery	15
	9.5.1	Service accessibility	15
	9.5.2	Delivery management	15
	9.5.3	Service evaluation	15
10		Interface	16
	10.1	Collection interface	16
		10.1.1 Secure access	16
		10.1.2 Digital representation	16
		10.1.3 Command distribution	16
		10.1.4 Message push	16
		10.1.5 Service access	16
		10.1.6 Protocol and format translation	17
	10.2	Delivery interface	17
		10.2.1 Authentication	17
		10.2.2 Inquire	17
		10.2.3 Subscription	17
		10.2.4 Procedure call	17
		10.2.5 System call	17
		10.2.6 Application programming interface (API)	17
		Annex A (informative) Example of SCDP data service reusability	18
		Annex B (informative) Elaboration with ISO/IEC 30145-3	20
		Bibliography	22
