## Software and systems engineering - Methods and tools for product line configuration management

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Abbreviated terms .....	2
5	Reference model for product line configuration management .....	3
5.1	Overview .....	3
5.2	Constituents of reference model for product line configuration management .....	3
6	Product line CM technical management .....	7
6.1	General .....	7
6.2	Product line configuration planning .....	7
6.2.1	Principal constituents .....	7
6.2.2	Define PL configuration strategy .....	8
6.2.3	Assign responsibility for PL configuration operationalization .....	8
6.2.4	Define success measures for PL configuration operationalization .....	8
6.2.5	Estimate adequate resources needed for PL configuration operationalization .....	9
6.2.6	Document PL configuration plans .....	9
6.3	Product line configuration enabling .....	10
6.3.1	Principal constituents .....	10
6.3.2	Enable PL configuration environment .....	10
6.3.3	Provide guidance for PL configuration operationalization .....	11
6.3.4	Enable measurement environment for quantifying PL configuration operationalization .....	11
6.4	Product line configuration managing .....	11
6.4.1	Principal constituents .....	11
6.4.2	Review PL configuration operationalization status with success measures .....	12
6.4.3	Control issues on PL configuration operationalization .....	12
6.4.4	Make corrective actions on PL configuration operationalization .....	13
7	Product line configuration management operationalization .....	13
7.1	General .....	13
7.2	Product line configuration management initiation .....	13
7.2.1	Principal constituents .....	13
7.2.2	Initiate PL configuration operation .....	14
7.2.3	Perform preliminary PL configuration .....	14
7.3	Product line configuration item identification .....	14
7.3.1	Principal constituents .....	14
7.3.2	Select PL configuration items .....	15
7.3.3	Identify variations of configuration items in time and space .....	16
7.3.4	Structure configuration information aligned to the structure of a product line .....	16
7.3.5	Establish unique identifiers facilitating traceability .....	17
7.4	Product line configuration baselining .....	17
7.4.1	Principal constituents .....	17
7.4.2	Capture PL configuration baselines in time and space .....	18

7.4.3	Create and release PL configuration baselines in time and space .....	18
7.4.4	Facilitate commonality and variability management in baselines of time and space .....	19
7.4.5	Maintain baselines readily available by distributed configuration management .....	19
7.5	Product line configuration status accounting .....	20
7.5.1	Principal constituents .....	20
7.5.2	Evaluate and coordinate change requests for PL configuration items .....	21
7.5.3	Identify PL configuration delta .....	21
7.5.4	Update baselines for PL configuration delta .....	21
7.5.5	Relate PL configuration delta to relevant PL configuration items .....	22
7.6	Product line configuration reporting .....	22
7.6.1	Principal constituents .....	22
7.6.2	Develop and maintain the PL configuration management status information .....	23
7.6.3	Capture, store, and report PL configuration anomaly .....	23
7.6.4	Capture, store and report PL configuration management data .....	23
8	Product line configuration management support .....	23
8.1	General .....	23
8.2	Quality assurance for product line CM .....	24
8.2.1	Principal constituents .....	24
8.2.2	Objectively evaluate PL configuration activities .....	25
8.2.3	Objectively evaluate PL configuration work products .....	25
8.2.4	Communicate and resolve non-compliance issues .....	25
8.2.5	Establish records of quality assurance activities for PL configuration .....	26
8.3	Product line configuration change control .....	26
8.3.1	Principal constituents .....	26
8.3.2	Identify and record change requests for product line configuration .....	27
8.3.3	Evaluate and coordinate the impacts of change requests on commonality and variability .....	27
8.3.4	Verify conformance among relevant configurations in time and space .....	27
8.3.5	Trace and manage approved changes to baselines .....	28
8.4	Traceability management for product line configuration .....	28
8.4.1	Principal constituents .....	28
8.4.2	Establish bi-directional traceability among PL configurations .....	29
8.4.3	Track and control PL configuration with commonality and variability .....	29
8.4.4	Facilitate integrated traceability management for PL configuration and PL configuration delta .....	30
	Annex A (informative) Roles of configuration management in each SSPL lifecycle process .....	31
	Bibliography .....	33
