

ISO/IEC 23220-1:2023-02 (E)

Cards and security devices for personal identification - Building blocks for identity management via mobile devices - Part 1: Generic system architectures of mobile eID systems

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	6
5	Design and privacy principles of mobile document systems	7
5.1	Design principles	7
5.2	Privacy and security principles	8
5.2.1	General	8
5.2.2	Data minimization	8
5.2.3	Consent and choice:	8
5.2.4	Accuracy and quality	8
5.2.5	Information security	9
6	General life-cycle phases and components of mobile document systems	9
6.1	Life-cycle phases of mobile document systems	9
6.2	Components of a mobile document system	10
6.2.1	Operational modes of components	10
6.2.2	Components of mobile document systems	11
7	Generic system architectures of mobile document systems in installation phase	13
8	Generic system architectures of mobile document systems in issuing phase	15
8.1	Source of user attributes	15
8.2	Generic sub-phases of issuing phase	15
8.3	System architectures in sub-phases user identification and mID-discovery	16
8.4	Architectures in sub-phase issuance	18
8.5	Monitoring service in issuing phase	20
9	On-site identification system architecture in operational phase	21
9.1	General sub-phases of on-site identification system architecture	21
9.2	On-site identification system architecture with local attribute storage	21
9.3	On-site identification system architecture with remote attribute storage	22
10	Remote identification system architecture in operational phase	23
10.1	General	23
10.2	Remote identification system architecture with local attribute storage	23
10.3	Remote identification system architecture with remote attribute storage	25
Annex A (informative) Examples of deployment options for issuers in issuing phase		28
Annex B (informative) Examples of deployment options in installation phase		35

Annex C (informative) Examples of holder enrolment	39
Annex D (informative) Examples of additional physical factor(s) of authentication	43
Bibliography	47
