ISO/IEC 23465-1:2023-02 (E)

Card and security devices for personal identification - Programming interface for security devices - Part 1: Introduction and architecture description

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols and abbreviated terms 2

5 System overview 3
- 5.1 Conditions of use 3
- 5.2 Simple system configuration 4
- 5.3 Complex system configuration 4
- 5.4 Generic examples using the different configurations 5
  - 5.4.1 SoC — Example of simple system configuration 5
  - 5.4.2 ID-systems 5
  - 5.4.3 Mobile devices with multiple security devices 6
  - 5.4.4 Mobile devices with a single security device 7
  - 5.4.5 Use cases 8

6 Architecture model 8
- 6.1 Components 8
  - 6.1.1 Client application 8
  - 6.1.2 Proxy 8
  - 6.1.3 Security device 8
- 6.2 System using the API 8
- 6.3 Data model of client application 9
- 6.4 Data management 10
- 6.5 Security architecture 11

7 API 12
- 7.1 General 12
- 7.2 Requirements for a programming interface 12
- 7.3 API Implementation 12

8 Proxy 12
- 8.1 General 12
- 8.2 Proxy characteristics 13

9 Evolution of security device types 13

Annex A (informative) **Design rules** 14

Annex B (informative) **Use cases** 15

Annex C (informative) **Variants of security device interfaces** 20

Annex D (informative) **Usage and co-existence of additional APIs** 21

Bibliography 22
