ISO/IEC/IEEE 26531:2023-03 (E)

Systems and software engineering - Content management for product life cycle, user and service management information for users

Contents

Page

Foreword vi

Introduction viii

1 Scope 1

2 Normative references 1

3 Terms,definitionsandabbreviatedterms 1
3.1 Terms and definitions 1
3.2 Abbreviated terms 5

4 Conformance 6

5 Component content management system development and implementation 6

6 Content management project initiation 7
6.1 Developing a business case 7
6.2 Defining requirements for a CCMS 9
6.2.1 Requirements definition 9
6.2.2 Output requirements 9
6.2.3 Storage and retrieval requirements 9
6.2.4 Assembly and linking requirements 10
6.2.5 Writing, reviewing and workflow requirements 11

7 Project planning for CCMS implementation 12
7.1 Implementation plan 12
7.2 Information model 12
7.3 Information model specification 13
7.4 Writing guidelines 14
7.5 Automation-assisted reviews 15
7.6 Reuse strategy 15
7.6.1 Content conditional processing 15
7.6.2 Content inclusion 15
7.6.3 Content variables 16
7.7 Metadata schema 16
7.7.1 General 16
7.7.2 Administrative metadata 17
7.7.3 Descriptive metadata 18
7.7.4 Processing metadata 18
7.8 Workflow 18
7.8.1 Workflow specification 18
7.8.2 Workflow approvals 18
7.8.3 Translation workflow 19
7.8.4 Workflow completion 20
7.9 Schedule of activities, deliverables, and responsibilities 20
7.10 Training plan 20
7.11 Style sheet development 20
7.12 Pilot project specification 20
7.13 Organizational rollout 21

8 Content development 21
8.1 Content creation 21
8.1.1 General 21
8.1.2 Structured writing 21
8.1.3 Unstructured writing 21
8.1.4 Content granularity 22
8.2 Content conversion 22
8.2.1 General 22
8.2.2 Microcontent 23

9 Management and control 23
9.1 Managing quality 23
9.2 Review of content 24
9.3 Approval of content 25
9.4 Search and retrieval 25
9.5 Localization and translation 25
9.5.1 Translation management 25
9.5.2 Content management for translation 26
9.5.3 Publication of translated content 26
9.5.4 Publication of multilingual content 26
9.5.5 Translation of vector graphics 26
9.6 Content deletion 27
9.7 Content and component archiving 27

10 Publication 28
10.1 Release management 28
10.2 Version management 28
10.3 Publication of content 29

11 Component content management system requirements 30
11.1 General 30
11.2 Component content management system framework 30
11.2.1 General storage requirements 30
11.2.2 Content types 31
11.2.3 Metadata structures 31
11.2.4 Administrative metadata 31
11.2.5 Descriptive metadata 31
11.2.6 Classification 32
11.2.7 Additional metadata requirements 32
11.2.8 Organizational structures 32
11.3 Component content management system management 32
11.3.1 Component creation and modification 32
11.3.2 Import/export 33
11.3.3 Bulk export 33
11.3.4 Dependency export 33
11.3.5 Archiving 34
11.4 Content object check-out and check in 34
11.4.1 General 34
11.4.2 Bulk check-out/check-in 34
11.4.3 Check-out and check-in after restart 34
11.5 Link management 34
11.6 Search 35
11.6.1 General 35
11.6.2 Full text search 35
11.6.3 Metadata search 37
11.6.4 Structured search 37
11.6.5 Advanced search capabilities 37
11.7 Versioning 38
11.7.1 General 38
11.7.2 Branch and merge 38
11.7.3 Release management 39
11.8 Graphics and multimedia management 39
11.9 Component content management system administration 40

11.9.1 User administration 40
11.9.2 Security 40
11.10 Content creation and acquisition 41
11.10.1 Writing interface 41
11.10.2 Content and metadata functions 41
11.10.3 Scientific notation and vector graphics 42
11.10.4 Writing integration 42
11.10.5 Acquisition 42
11.11 Workflow 43
11.11.1 Workflow creation 43
11.11.2 Workflow specification 43
11.11.3 Workflow reporting 44
11.12 Content publication 45
11.12.1 General 45
11.12.2 Export to publishing support 45
11.12.3 Centralized publishing support 45
11.12.4 Publishing interface 45
11.12.5 XML publishing pipeline 46
11.12.6 Dynamic publishing 46
11.13 Localization and translation management 46
11.13.1 General 46
11.13.2 XLIFF support 47
11.14 Component content management system interoperability 47
11.14.1 General 47
11.14.2 Libraries and frameworks 47
11.14.3 Web services 47
11.14.4 Application Programming Interface methods 48
11.14.5 Webhooks and triggers 49

Annex A (informative) Business case considerations for content management 50
