ISO/TS 18621-31:2024-01 (E)

Graphic technology - Image quality evaluation methods for printed matter - Part 31: Evaluation of the perceived resolution of printing systems with the Contrast-Resolution chart

Contents

Page

Foreword ..... **iv**

Introduction ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **1**

4 Requirements **3**
- 4.1 General 3
- 4.2 Apparatus requirements 3
  - 4.2.1 Printing system requirements 3
  - 4.2.2 Scanning system requirements 3
- 4.3 Procedure 3
  - 4.3.1 Test chart 3
  - 4.3.2 Evaluation intent 4
  - 4.3.3 Printing and scanning 5
  - 4.3.4 Evaluation process 6

5 Resolution-Score processing **6**
- 5.1 General 6
- 5.2 Element identification 6
- 5.3 Scanning signal interpretation 6
- 5.4 Spatial filtering 6
- 5.5 Normalized 2-D cross-correlation 7
- 5.6 Resolution-score computation 7

6 Reporting **12**

Annex A (normative) **Test chart and reference files — Availability** **14**

Annex B (normative) **Printing process and data path requirements** **17**

Annex C (normative) **Linearization** **21**

Annex D (normative) **Scanner conformance requirements** **23**

Annex E (normative) **Evaluation process conformance** **29**

Annex F (normative) **Spatial filter — Specification** **31**

Bibliography **35**
