

ISO/IEC 27011:2024-03 (E)

Information security, cybersecurity and privacy protection - Information security controls based on ISO/IEC 27002 for telecommunications organizations

Contents

	Page
1 Scope	1
2 Normative references	1
3 Definitions and abbreviations.....	1
3.1 Definitions.....	1
3.2 Abbreviations	2
4 Overview	2
4.1 Structure of this Recommendation International Standard	2
4.2 Information security management systems in telecommunications organizations.....	3
5 Organizational controls	5
5.1 Policies for information security	5
5.2 Information security roles and responsibilities.....	5
5.3 Segregation of duties.....	6
5.4 Management responsibilities.....	6
5.5 Contact with authorities	6
5.6 Contact with special interest groups.....	6
5.7 Threat intelligence.....	6
5.8 Information security in project management.....	6
5.9 Inventory of information and other associated assets.....	6
5.10 Acceptable use of information and other associated assets	6
5.11 Return of assets	6
5.12 Classification of information.....	7
5.13 Labelling of information	7
5.14 Information transfer.....	7
5.15 Access control	7
5.16 Identity management.....	7
5.17 Authentication information	7
5.18 Access rights	7
5.19 Information security in supplier relationships	7
5.20 Addressing information security within supplier agreements	8
5.21 Managing information security in the ICT supply chain.....	8
5.22 Monitoring, review and change management of supplier services.....	8
5.23 Information security for use of cloud services	8
5.24 Information security incident management planning and preparation	8
5.25 Assessment and decision on information security events.....	9
5.26 Response to information security incidents.....	9
5.27 Learning from information security incidents	9
5.28 Collection of evidence.....	9
5.29 Information security during disruption.....	9

5.30	ICT readiness for business continuity	10
5.31	Legal, statutory, regulatory and contractual requirements	10
5.32	Intellectual property rights	10
5.33	Protection of records	10
5.34	Privacy and protection of PII.....	10
5.35	Independent review of information security.....	10
5.36	Compliance with policies, rules and standards for information security.....	10
5.37	Documented operating procedures	10
5.38	TEL – Interconnected telecommunications services	10
5.39	TEL – Security management of telecommunications services delivery	11
5.40	TEL – Response to spam.....	12
5.41	TEL – Response to DoS/DDoS attacks	12
5.42	TEL – Non-disclosure of communications.....	13
5.43	TEL – Essential communications.....	14
5.44	TEL – Legality of emergency actions	15
5.45	TEL – Coordination for information security incident management	15
	People controls	16
6.1	Screening.....	16
6.2	Terms and conditions of employment	16
6.3	Information security awareness, education and training	16
6.4	Disciplinary process	16
6.5	Responsibilities after termination or change of employment.....	16
6.6	Confidentiality or non-disclosure agreements.....	16
6.7	Remote working	17
6.8	Information security event reporting	17
	Physical controls	17
7.1	Physical security perimeter	17
7.2	Physical entry	17
7.3	Securing offices, rooms and facilities	17
7.4	Physical security monitoring	17
7.5	Protecting against physical and environmental threats.....	17
7.6	Working in secure areas	17
7.7	Clear desk and clear screen	17
7.8	Equipment siting and protection.....	18
7.9	Security of assets off-premises.....	18
7.10	Storage media.....	18
7.11	Supporting utilities	18
7.12	Cabling security	18
7.13	Equipment maintenance	18
7.14	Secure disposal or re-use of equipment.....	18
7.15	TEL – Securing communication centres	18
7.16	TEL – Securing telecommunications equipment room	19
7.17	TEL – Securing physically isolated operation areas	20
7.18	TEL – Equipment sited in other carriers' premises.....	21
7.19	TEL – Equipment sited in user premises.....	21
	Technological controls	22
8.1	User endpoint devices.....	22
8.2	Privileged access rights	22
8.3	Information access restriction	22
8.4	Access to source code	22
8.5	Secure authentication	22

8.6 Capacity management	22
8.7 Protection against malware	22
8.8 Management of technical vulnerabilities.....	22
8.9 Configuration management	22
8.10 Information deletion.....	22
8.11 Data masking.....	22
8.12 Data leakage prevention	22
8.13 Information backup	22
8.14 Redundancy of information processing facilities	22
8.15 Logging	23
8.16 Monitoring activities	23
8.17 Clock synchronization.....	23
8.18 Use of privileged utility programs.....	23
8.19 Installation of software on operational systems	23
8.20 Network security	23
8.21 Security of network services	23
8.22 Segregation of networks.....	24
8.23 Web filtering	24
8.24 Use of cryptography	24
8.25 Secure development lifecycle.....	24
8.26 Application security requirements.....	24
8.27 Secure system architecture and engineering principles.....	24
8.28 Secure coding	24
8.29 Security testing in development and acceptance	24
8.30 Outsourced development.....	24
8.31 Separation of development, test and production environments.....	24
8.32 Change management	24
8.33 Test information	25
8.34 Protection of information systems during audit testing.....	25
8.35 TEL – Telecommunications carrier identification and authentication by users	25
Annex A Additional guidance for network security	26
A.1 Security measures against network attacks	26
A.2 Network security measures for network congestion.....	27
Bibliography	28
