

ISO/IEC 19795-10:2024-10 (E)

Information technology - Biometric performance testing and reporting - Part 10: Quantifying biometric system performance variation across demographic groups

Contents

Page

- Foreword..... v
- Introduction vi
- 1 Scope 1
- 2 Normative references 1
- 3 Terms and definitions 2
- 4 Conformance 4
- 5 Planning the evaluation 4
 - 5.1 Identifying the scope of the evaluation 4
 - 5.2 Demographic variables 5
 - 5.2.1 Ground truth requirements 5
 - 5.2.2 Categorical demographic variables 5
 - 5.2.3 Continuous demographic variables 7
 - 5.2.4 Other demographic variables 8
- 6 Executing the evaluation 8
 - 6.1 Generation of mated comparison and identification trials 8
 - 6.2 Generation of non-mated comparison and identification trials 8
 - 6.2.1 General 8
 - 6.2.2 Verification (1:1) 8
 - 6.2.3 Identification (1:N) 8
 - 6.3 Selection of a threshold 9
 - 6.4 Calculating differential performance based on categorical variables for two specific demographic groups 9
 - 6.4.1 General 9
 - 6.4.2 Differential performance between two groups based on mathematical difference 9
 - 6.4.3 Differential performance between two groups based on mathematical ratio 10
 - 6.5 Calculating differential performance based on categorical variables for more than two groups 10
 - 6.5.1 General 10
 - 6.5.2 Differential performance for more than two groups based on the largest error rate relative to the geometric mean 10
 - 6.5.3 Differential performance for more than two groups based on the Gini coefficient 11
 - 6.6 Calculating differential performance in identification trials 11
 - 6.7 Calculating demographic differentials for failure-to-enrol rate, failure-to-acquire rate and transaction duration 12
 - 6.8 Calculating demographic differentials for continuous variables 12
 - 6.9 Comparison score differential measures 13
 - 6.10 Calculating uncertainty 14
 - 6.10.1 Uncertainty in demographic differentials 14
 - 6.10.2 Sampling the target population 14
 - 6.10.3 Sample size requirements 15
- 7 Reporting the evaluation results 16
 - 7.1 Reporting the experimental design 16
 - 7.2 Reporting the target application 16
 - 7.3 Reporting the test population 16
 - 7.4 Reporting differential performance 17
 - 7.4.1 Reporting differential performance on previously collected datasets 17
 - 7.4.2 Reporting differential performance for two or more groups 17

7.4.3	Reporting differential performance against a benchmark	18
7.4.4	Reporting error trade-off metrics	18
7.4.5	Reporting threshold management policy.....	18
7.5	Reporting comparison score differential measures	18
7.6	Reporting exception handling	19
Annex A (informative) Example of estimating sample size for differential performance.....		20
Annex B (informative) Calculating aggregate equitability measures.....		23
Bibliography.....		25
