ISO/IEC 9868:2025-02 (E)

Information technology - Design, development, use and maintenance of biometric identification systems involving passive capture subjects

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **2**
3.1 Roles 2
3.2 Categories of biometric identification system and use cases 3
3.3 Miscellaneous 4

4 Abbreviated terms **4**

5 Conformance **5**

6 Scenarios and use of biometric systems involving passive capture subjects **6**
6.1 Main characteristics 6
6.2 Use cases and scenarios 6
6.3 Minimizing identification errors 7

7 Consideration of risk arising from BISPCS **8**

8 Design and development practice **9**
8.1 Biometric system and algorithm 9
8.2 Impact of capture devices on training and testing 10

9 Technical capabilities of the system **10**
9.1 Performance 10
9.1.1 General 10
9.1.2 Biometric recognition 10
9.1.3 Demographic differential performance assessment 11
9.1.4 Detection of anomalous image quality 11
9.1.5 Security evaluation and presentation attack detection 11
9.1.6 Third-party ex-ante performance evaluation 11
9.2 Security and integrity 12
9.3 Biometric data management 12
9.4 Support for manual review 13
9.5 Support for human oversight 14
9.6 Support for operational testing 14
9.7 Documentation 14

10 Operational practice **15**
10.1 Organizational control 15
10.2 Competence of biometric system operators 15
10.3 Operational security 16
10.4 Privacy measures 16
10.4.1 General 16
10.4.2 Privacy principles of ISO/IEC 29100 16
10.4.3 Biometric information protection 19
10.5 Operational monitoring 19
10.5.1 Monitoring 19
10.5.2 Operational testing and internal audit 19
10.5.3 Feedback 20
10.5.4 Threshold management 20

10.6 Improvement 21
10.6.1 Retraining of ML-based biometric systems 21
10.6.2 Continuous learning 21
10.6.3 Continual improvement 21
Annex A (informative) **Use case profiles** **23**
Annex B (informative) **Example audit report** **26**
Bibliography **30**
