Foreword ..... **v**

1 Scope **1**

2 Normative references **1**

3 Terms, definitions, symbols and abbreviated terms **1**
3.1 Terms and definitions 1
3.2 Symbols and abbreviated terms 2

4 Default items applicable to the test methods **5**
4.1 Test environment 5
4.2 Pre-conditioning 5
4.3 Setup tolerances 5
4.4 Spurious inductance 6
4.5 Measurement uncertainty 6
4.6 DUT position 6
4.7 Test conditions for PCD 6
4.8 Test conditions for PICC 7

5 Apparatus and circuits for test of ISO/IEC 14443-1 and ISO/IEC 14443-2 parameters **10**
5.1 Overview 10
5.2 Minimum requirements for measurement instruments — Oscilloscope 10
5.3 Calibration coils 11
5.3.1 General 11
5.3.2 Size of the calibration coil card 11
5.3.3 Thickness and material of the calibration coil card 11
5.3.4 Coil characteristics 11
5.4 Test PCD assemblies 12
5.4.1 General 12
5.4.2 Test PCD antennas 13
5.4.3 Sense coils 13
5.4.4 Mechanical construction of the Test PCD assemblies 14
5.5 Reference PICC and Active Reference PICC 15
5.5.1 General 15
5.5.2 Reference PICC 15
5.5.3 Active Reference PICC 18
5.6 PICC transmission test setup 20
5.6.1 General description 20
5.6.2 Phase stability precondition test 20
5.7 EMD test setup 21
5.7.1 General description 21
5.7.2 Computation of power versus time 21
5.7.3 Noise floor precondition test 22

6 Test of ISO/IEC 14443-1 parameters **22**
6.1 PCD test for alternating magnetic fields 22
6.1.1 Purpose 22
6.1.2 Procedure 23
6.1.3 Test report 23
6.2 PICC test for alternating magnetic fields 23
6.2.1 Purpose 23
6.2.2 Apparatus 23

6.2.3 Procedure 24
6.2.4 Test report 24
6.3 PXD tests 24

7 Test of ISO/IEC 14443-2 parameters 24
7.1 PCD tests 24
7.1.1 PCD field strength 25
7.1.2 Modulation index *m* and waveform 26
7.1.3 Phase stability test 27
7.1.4 Load modulation reception for PICC to PCD bit rates of $f_c/128$, $f_c/64$, $f_c/32$ and $f_c/16$ 27
7.1.5 Load modulation reception for PICC to PCD bit rates of $f_c/8$, $f_c/4$ and $f_c/2$ 34
7.1.6 PCD EMD immunity test 35
7.2 PICC tests 36
7.2.1 PICC transmission 36
7.2.2 PICC EMD level and low EMD time test 38
7.2.3 PICC reception 39
7.2.4 PICC resonance frequency 43
7.2.5 PICC maximum loading effect 43
7.2.6 PICC operating field strength test 45
7.3 Test methods for bit rates of $3f_c/4$, f_c, $3f_c/2$ and $2f_c$ from PCD to PICC 45
7.4 PXD tests 45

8 Test of ISO/IEC 14443-3 and ISO/IEC 14443-4 parameters 46
8.1 PCD tests 46
8.1.1 PCD EMD recovery test 46
8.1.2 Additional PCD tests 47
8.2 PICC tests 48
8.3 PXD tests 48
8.3.1 PCD and PICC Modes 48
8.3.2 Automatic mode alternation 48
8.3.3 PCD Mode 49
8.3.4 PICC Mode 50

Annex A (normative) **Test PCD antennas 53**
Annex B (normative) **PICC Type A FDT determination method 60**
Annex C (normative) **Sense coils 63**
Annex D (normative) **Reference PICCs and Active Reference PICCs 66**
Annex E (normative) **PCD modulation index *m* and waveform analysis tool 78**
Annex F (informative) **Program for the evaluation of the load modulation amplitude 84**
Annex G (normative) **Additional PICC test methods 85**
Annex H (normative) **Additional PCD test methods 148**
Annex I (normative) **High bit rate selection test methods for PCD 192**
Annex J (informative) **Program for EMD level measurements 204**
Annex K (normative) **Test methods for bit rates of $3f_c/4$, f_c, $3f_c/2$ and $2f_c$ from PCD to PICC 205**
Annex L (normative) **Frame with error correction test methods 214**
Annex M (normative) **PCD phase stability analysis tool 223**
Annex N (normative) **PICC amplitude and phase drift analysis tool 225**
Annex O (normative) **Conformance test plan 232**
