

ISO/IEC TS 18661-5:2025-03 (E)

Programming languages, their environments, and system software interfaces - Floating-point extensions for C - Part 5: Supplementary attributes

Contents

Page

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Conformance	1
5 C standard conformance	2
5.1 Freestanding implementations	2
5.2 Predefined macros	2
5.3 Standard headers	2
6 Standard pragmas	2
7 Evaluation formats	3
7.1 General	3
7.2 Evaluation method pragma	3
7.3 Evaluation method pragma for decimal floating types	4
7.4 Effective evaluation method macros	4
7.5 Evaluation type macros	4
7.6 Evaluation formats for <code><tgmath.h></code>	5
8 Optimization controls	5
8.1 General	5
8.2 The <code>FP_ALLOW_VALUE_CHANGING_OPTIMIZATION</code> pragma	6
8.3 The <code>FP_ALLOW_ASSOCIATIVE_LAW</code> pragma	6
8.4 The <code>FP_ALLOW_DISTRIBUTIVE_LAW</code> pragma	7
8.5 The <code>FP_ALLOW_MULTIPLY_BY_RECIPROCAL</code> pragma	7
8.6 The <code>FP_ALLOW_ZERO_SUBNORMAL</code> pragma	8
8.7 The <code>FP_ALLOW_CONTRACT_FMA</code> pragma	8
8.8 The <code>FP_ALLOW_CONTRACT_OPERATION_CONVERSION</code> pragma	9
8.9 The <code>FP_ALLOW_CONTRACT</code> pragma	9
9 Reproducibility	10
9.1 General	10
9.2 The <code>FP_REPRODUCIBLE</code> pragma	10
9.3 Reproducible code	11
10 Alternate exception handling	12
10.1 General	12
10.2 The <code>FENV_EXCEPT</code> pragma	13
Bibliography	20
