ISO/IEC TS 20125-1:2026-02 (E)

Information technology - Digital services ecodesign - Part 1: Ecopractices for life cycle stages

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms, definitions and abbreviations **1**
3.1 Terms 1
3.2 Abbreviated terms 5

4 Principles, usage guidelines and clarifications for digital services ecodesign **5**
4.1 Underlying principles 5
4.2 Intended audience 5
4.3 How to read and use the document and implementation matters 6
4.3.1 How to read and use the document 6
4.3.2 Implementation matters 6
4.3.3 Trade-offs 7
4.4 Environmental impacts 7
4.5 Selection process 8
4.6 Development environment 9
4.7 Indicators 9

5 Life cycle stages **9**
5.1 General 9
5.2 Stage 1: Requirements gathering, prioritization and contextualization 10
5.3 Stage 2: Design phase 10
5.4 Stage 3: Implementation 11
5.5 Stage 4: Use and run or operations 11
5.6 Stage 5: Maintenance 11
5.7 Stage 6: End of life 12

6 Requirements and recommendations per stage **12**
6.1 Stage 1: Requirements gathering, prioritization and contextualization 12
6.1.1 Collect and challenge functional requirements and usages ecopractice 12
6.1.2 Analyse and size requirements and usages to the minimum ecopractice 13
6.1.3 Challenge the added value of the service for all or part of service ecopractice 14
6.1.4 Assess the impact of digital service ecopractice 14
6.1.5 Set an environmental budget ecopractice 16
6.1.6 Take a systemic view on service ecopractice 16
6.2 Stage 2: Design phase 17
6.2.1 Document the ecodesign methodology ecopractice 17
6.2.2 Design user path using a frugal approach ecopractice 18
6.2.3 Identify minimal technical solutions to meet the requirements ecopractice 19
6.2.4 Setup a data retention and purge policy ecopractice 21
6.2.5 Assess design consistency with regards to initial requirements and environmental challenges ecopractice 22
6.2.6 Prepare and plan total or partial service end of life ecopractice 23
6.3 Stage 3: Implementation 24
6.3.1 Collect strictly needed items ecopractice 24
6.3.2 Limit and optimise processing ecopractice 25
6.3.3 Select scalable and appropriate technologies and infrastructures ecopractice 27
6.3.4 Integrate a service usage and efficiency monitoring ecopractice 28
6.3.5 Favour consolidation, sharing and capitalisation of service elements ecopractice 29

6.4 Stage 4: Use and run or operations ... 30
6.4.1 Manage service frontend to maintain its efficiency ecopractice ... 30
6.4.2 Manage service backend to maintain its efficiency ecopractice ... 31
6.4.3 Monitor service ecosystem to maintain its efficiency ecopractice ... 32
6.4.4 Raise users' awareness of service usage environmental impacts ecopractice ... 33
6.4.5 Ensure usefulness of each service function ecopractice ... 34
6.4.6 Check usability of each service function ecopractice ... 35
6.4.7 Check usage of every function of the service ecopractice ... 36
6.5 Stage 5: Maintenance ... 37
6.5.1 Ensure continuous training of teams and monitor ecodesign practices ecopractice ... 37
6.5.2 Fix service frontend to maintain and enhance its efficiency ecopractice ... 38
6.5.3 Fix service backend to maintain and enhance its efficiency ecopractice ... 38
6.5.4 Assess emerging technology opportunities to enhance service efficiency and fight its obsolescence ecopractice ... 39
6.6 Stage 6: End of life ... 40
6.6.1 Question appropriateness of stopping the service totally or partially ecopractice ... 40
6.6.2 Decide on future of specific data of service ecopractice ... 40
6.6.3 Decide on future of specific software of service ecopractice ... 41
6.6.4 Decide on future of freed up hardware and resources ecopractice ... 42

7 Conformance and communication ... 42
7.1 Conformance ... 42
7.1.1 General ... 42
7.1.2 Partial conformance ... 42
7.1.3 Full conformance ... 43
7.2 Communication ... 43
7.2.1 General ... 43
7.2.2 Partial conformance ... 43
7.2.3 Full conformance ... 44

Annex A (informative) **Cross reference table of ecopractices and service types ... 45**

Annex B (normative) **Architecture of digital services ... 47**

Annex C (informative) **Environmental impacts table ... 50**

Annex D (informative) **Impacts assessment methodologies ... 52**

Annex E (informative) **Ecodesign and "SQuaRE" mapping ... 56**

Bibliography ... 61
