

ISO/IEC TS 20125-1:2026-02 (E)

Information technology - Digital services ecodesign - Part 1: Ecopractices for life cycle stages

Contents

Page

Foreword.....	v
Introduction.....	vi
1 Scope.....	1
2 Normative references.....	1
3 Terms, definitions and abbreviations.....	1
3.1 Terms.....	1
3.2 Abbreviated terms.....	5
4 Principles, usage guidelines and clarifications for digital services ecodesign.....	5
4.1 Underlying principles.....	5
4.2 Intended audience.....	5
4.3 How to read and use the document and implementation matters.....	6
4.3.1 How to read and use the document.....	6
4.3.2 Implementation matters.....	6
4.3.3 Trade-offs.....	7
4.4 Environmental impacts.....	7
4.5 Selection process.....	8
4.6 Development environment.....	9
4.7 Indicators.....	9
5 Life cycle stages.....	9
5.1 General.....	9
5.2 Stage 1: Requirements gathering, prioritization and contextualization.....	10
5.3 Stage 2: Design phase.....	10
5.4 Stage 3: Implementation.....	11
5.5 Stage 4: Use and run or operations.....	11
5.6 Stage 5: Maintenance.....	11
5.7 Stage 6: End of life.....	12
6 Requirements and recommendations per stage.....	12
6.1 Stage 1: Requirements gathering, prioritization and contextualization.....	12
6.1.1 Collect and challenge functional requirements and usages ecopractice.....	12
6.1.2 Analyse and size requirements and usages to the minimum ecopractice.....	13
6.1.3 Challenge the added value of the service for all or part of service ecopractice.....	14
6.1.4 Assess the impact of digital service ecopractice.....	14
6.1.5 Set an environmental budget ecopractice.....	16
6.1.6 Take a systemic view on service ecopractice.....	16
6.2 Stage 2: Design phase.....	17
6.2.1 Document the ecodesign methodology ecopractice.....	17
6.2.2 Design user path using a frugal approach ecopractice.....	18
6.2.3 Identify minimal technical solutions to meet the requirements ecopractice.....	19
6.2.4 Setup a data retention and purge policy ecopractice.....	21
6.2.5 Assess design consistency with regards to initial requirements and environmental challenges ecopractice.....	22
6.2.6 Prepare and plan total or partial service end of life ecopractice.....	23
6.3 Stage 3: Implementation.....	24
6.3.1 Collect strictly needed items ecopractice.....	24
6.3.2 Limit and optimise processing ecopractice.....	25
6.3.3 Select scalable and appropriate technologies and infrastructures ecopractice.....	27
6.3.4 Integrate a service usage and efficiency monitoring ecopractice.....	28
6.3.5 Favour consolidation, sharing and capitalisation of service elements ecopractice.....	29

6.4	Stage 4: Use and run or operations	30
6.4.1	Manage service frontend to maintain its efficiency ecopractice	30
6.4.2	Manage service backend to maintain its efficiency ecopractice	31
6.4.3	Monitor service ecosystem to maintain its efficiency ecopractice	32
6.4.4	Raise users' awareness of service usage environmental impacts ecopractice	33
6.4.5	Ensure usefulness of each service function ecopractice	34
6.4.6	Check usability of each service function ecopractice	35
6.4.7	Check usage of every function of the service ecopractice	36
6.5	Stage 5: Maintenance	37
6.5.1	Ensure continuous training of teams and monitor ecodesign practices ecopractice	37
6.5.2	Fix service frontend to maintain and enhance its efficiency ecopractice	38
6.5.3	Fix service backend to maintain and enhance its efficiency ecopractice	38
6.5.4	Assess emerging technology opportunities to enhance service efficiency and fight its obsolescence ecopractice	39
6.6	Stage 6: End of life	40
6.6.1	Question appropriateness of stopping the service totally or partially ecopractice	40
6.6.2	Decide on future of specific data of service ecopractice	40
6.6.3	Decide on future of specific software of service ecopractice	41
6.6.4	Decide on future of freed up hardware and resources ecopractice	42
7	Conformance and communication	42
7.1	Conformance	42
7.1.1	General	42
7.1.2	Partial conformance	42
7.1.3	Full conformance	43
7.2	Communication	43
7.2.1	General	43
7.2.2	Partial conformance	43
7.2.3	Full conformance	44
	Annex A (informative) Cross reference table of ecopractices and service types	45
	Annex B (normative) Architecture of digital services	47
	Annex C (informative) Environmental impacts table	50
	Annex D (informative) Impacts assessment methodologies	52
	Annex E (informative) Ecodesign and "SQuaRE" mapping	56
	Bibliography	61
