ISO/TR 16320-1:2026-04 (E)

Processes and data in e-commerce - Smart contract-based B2B electronic transaction execution and verification - Part 1: Reference model

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Abbreviated terms 2

5 Overview of B2B e-transaction based on smart contract 3
5.1 Overview 3
5.2 Smart contract-based B2B system configuration 4

6 Smart contract-based B2B e-transaction execution and verification model: SEEV 4
6.1 Purpose 4
6.2 Prerequisites 5
6.3 SEEV scenario 6
6.4 SEEV component 6
6.5 SEEV processes 7

7 Authority authentication mechanism (AAM) 8
7.1 Purpose 8
7.2 Node classification 8
7.3 AAM process 9

8 Consensus agreement mechanism: CAM 10
8.1 Purpose 10
8.2 Consensus process of CAM 11

9 Smart contract verification mechanism: SVM 13
9.1 Purpose 13
9.2 Verification process 13

10 Security controller mechanism: SCM 14
10.1 Purpose 14
10.2 SCM process 14
