Processes and data in e-commerce - Smart contract-based B2B electronic transaction execution and verification - Part 1: Reference model

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	2
5	Overview of B2B e-transaction based on smart contract	3
5.1	Overview	3
5.2	Smart contract-based B2B system configuration	4
6	Smart contract-based B2B e-transaction execution and verification model: SEEV	4
6.1	Purpose	4
6.2	Prerequisites	5
6.3	SEEV scenario	6
6.4	SEEV component	6
6.5	SEEV processes	7
7	Authority authentication mechanism (AAM)	8
7.1	Purpose	8
7.2	Node classification	8
7.3	AAM process	9
8	Consensus agreement mechanism: CAM	10
8.1	Purpose	10
8.2	Consensus process of CAM	11
9	Smart contract verification mechanism: SVM	13
9.1	Purpose	13
9.2	Verification process	13
10	Security controller mechanism: SCM	14
10.1	Purpose	14
10.2	SCM process	14
