

ISO/IEC 15437:2001-08 (E)

Information technology - Enhancements to LOTOS (E-LOTOS)

Contents		Page
1	Scope	1
2	Conformance	1
3	Normative reference	1
4	Terms, definitions and notation	1
5	E-LOTOS grammar	2
5.1	Lexical Structure	2
5.1.1	Character set	2
5.1.2	Comments and separators	3
5.1.3	Identifiers	3
5.1.4	Reserved words	3
5.1.5	Identifiers classes	4
5.1.6	Non-terminals classes	4
5.2	Syntax of the language	5
5.2.1	Specification	5
5.2.2	Top-level declaration	6
5.2.3	Module body	6
5.2.4	Module expression	6
5.2.5	Module formal parameters	6
5.2.6	Interface expressions	6
5.2.7	Record module expression	6
5.2.8	Interface body	7
5.2.9	Formal parameter list	7
5.2.10	Renaming/Instantiation	7
5.2.11	Equations declaration	7
5.2.12	Simple equations declaration	8
5.2.13	Declarations	8
5.2.14	Expressions	8
5.2.15	Expression Atoms	8
5.2.16	Behaviour expressions	9
5.2.17	Disabling behaviour expression	10
5.2.18	Synchronization behaviour expression	10
5.2.19	Concurrency behaviour expression	10
5.2.20	Selection behaviour expression	10
5.2.21	Suspend/Resume behaviour expression	10
5.2.22	Interleaving behaviour expression	10
5.2.23	Behaviour term	10
5.2.24	Behaviour atom	11
5.2.25	Type expressions	12
5.2.26	Record type expressions	12
5.2.27	Value expressions	12
5.2.28	Record value expressions	13
5.2.29	Patterns	13
5.2.30	Gate parameter list	13
5.2.31	Actual parameter list	13
5.2.32	Exception parameter list	13
5.2.33	Record patterns	14
5.2.34	Behaviour pattern matching	14
5.2.35	Expression pattern matching	14

5.2.36	In parameter list	14
5.2.37	In parameter	14
6	E-LOTOS abstract syntax	14
6.1	Overview	14
6.1.1	Syntactic sugar	15
6.1.2	Abstract syntax	15
6.2	Concrete to abstract syntactic translation	16
6.2.1	Interface body	16
6.2.2	Formal parameter list	18
6.2.3	Declarations	18
6.2.4	Expressions	21
6.2.5	Expression atoms	21
6.2.6	Behaviour expressions	24
6.2.7	Interleaving behaviour expression	24
6.2.8	Behaviour atom	25
6.2.9	Type expressions	31
6.2.10	Record type expressions	32
6.2.11	Record value expressions	32
6.2.12	Gate parameter list	33
6.2.13	Actual parameter list	33
6.2.14	Exception parameter list	33
6.2.15	Record patterns	33
6.2.16	In parameter list	34
6.2.17	In parameter	34
7	E-LOTOS semantics	35
7.1	Overview	35
7.2	Static Semantics	36
7.2.1	Static semantic objects for Base	36
7.2.2	Judgements on static semantics for Base	37
7.2.3	Extended identifiers	38
7.2.4	Static semantic objects for Modules	39
7.2.5	Judgements on static semantics for Modules	39
7.2.6	Cycle freedom	40
7.2.7	Context morphism	40
7.2.8	Realization	40
7.2.9	Interface Instantiation	40
7.2.10	Interface Matching	41
7.2.11	Renaming/Instantiation	41
7.3	Untimed dynamic semantics	44
7.3.1	Untimed dynamic semantic objects for Base	44
7.3.2	Judgements on untimed dynamic semantics for Base	45
7.3.3	Dynamic semantic objects for Modules	46
7.3.4	Judgements on untimed dynamic semantics for Modules	47
7.3.5	Environment morphism	48
7.3.6	Signature Instantiation	48
7.3.7	Renaming/Instantiation	48
7.4	Timed dynamic semantics	48
7.4.1	Judgements on timed dynamic semantics	49
7.5	Write-many variables: the value substitution operator	49
8	The E-LOTOS modules	52
8.1	Specification	52
8.1.1	Specification	52
8.2	Top-level declaration	53
8.2.1	Module not constrained by an interface	53
8.2.2	Module constrained by an interface	53
8.2.3	Generic module not constrained by an interface	54
8.2.4	Generic module constrained by an interface	55
8.2.5	Interface declaration	55
8.2.6	Sequential top declaration	56

8.3	Module body	56
8.3.1	Block declaration	56
8.3.2	Module Expression	57
8.4	Module expression	57
8.4.1	Module aliasing not constrained by an interface	57
8.4.2	Module aliasing constrained by an interface	58
8.4.3	Generic module actualization not constrained by an interface	58
8.4.4	Generic module actualization constrained by an interface	59
8.4.5	Generic module renaming/instantiation	59
8.5	Module formal parameters	60
8.5.1	Single	60
8.5.2	Disjoint union	60
8.6	Interface expressions	61
8.6.1	Interface identifier	61
8.6.2	Simple renaming	61
8.6.3	Explicit body	61
8.7	Interface body	62
8.7.1	Type hiding the implementation	62
8.7.2	Type synonym	62
8.7.3	Constructed type	62
8.7.4	Named record type	63
8.7.5	Process declaration	63
8.7.6	Equations	64
8.7.7	Sequential declaration	64
8.8	Record module expression	64
8.8.1	Single	64
8.8.2	Disjoint union	65
8.8.3	Renaming tuple	65
8.9	Equation declarations	65
8.9.1	Equations declaration	65
8.9.2	Sequential	66
8.10	Simple equation declaration	66
8.11	Declarations	66
8.11.1	Type synonym	66
8.11.2	Type declaration	66
8.11.3	Named record type	67
8.11.4	Process declaration	67
8.11.5	Sequential declarations	68
9	The E-LOTOS base language	69
9.1	Introduction	69
9.2	Behaviours	69
9.2.1	Disabling behaviour expression	69
9.2.2	Synchronization behaviour expression	70
9.2.3	Concurrency behaviour expression	71
9.2.4	Selection behaviour expression	73
9.2.5	Suspend/Resume behaviour expression	73
9.2.6	Sequential composition	74
9.2.7	Action	75
9.2.8	Internal action	76
9.2.9	Successful termination without values	76
9.2.10	Successful termination	76
9.2.11	Inaction	77
9.2.12	Time block	77
9.2.13	Delay	77
9.2.14	Assignment	78
9.2.15	Nondeterministic Assignment	78
9.2.16	Choice over values	79
9.2.17	Trap	80
9.2.18	General parallel	81
9.2.19	Parallel over values	83
9.2.20	Variable declaration	84

9.2.21	Gate hiding	84
9.2.22	Renaming	85
9.2.23	Process instantiation	87
9.2.24	loop iteration	87
9.2.25	Case	88
9.2.26	Case with tuples	88
9.2.27	Signalling	89
9.3	Type expressions	90
9.3.1	Type identifier	90
9.3.2	Empty type	90
9.3.3	Universal type	90
9.3.4	Record type	90
9.4	Record type expressions	91
9.4.1	Singleton record	91
9.4.2	Universal record	91
9.4.3	Record disjoint union	91
9.4.4	Empty record	92
9.5	Value expressions	92
9.5.1	Primitive constants	92
9.5.2	Variables	92
9.5.3	Record values	92
9.5.4	Constructor application	93
9.6	Record value expressions	93
9.6.1	Singleton record	93
9.6.2	Record disjoint union	93
9.6.3	Empty record	93
9.7	Patterns	94
9.7.1	Record pattern	94
9.7.2	Wildcard	94
9.7.3	Variable binding	94
9.7.4	Expression pattern	95
9.7.5	Constructor application	95
9.7.6	Explicit typing	96
9.8	Record patterns	96
9.8.1	Singleton record pattern	97
9.8.2	Record wildcard	97
9.8.3	Record match	97
9.8.4	Record disjoint union	98
9.8.5	Empty record pattern	98
9.9	Record of variables	98
9.9.1	Singleton record variable	98
9.9.2	Record disjoint union	98
9.10	Behaviour pattern-matching	99
9.10.1	Single match	99
9.10.2	Multiple match	100
10	Predefined library	100
10.1	Booleans	101
10.2	Natural Numbers	103
10.3	Integral Numbers	106
10.4	Rational Numbers	109
10.5	Floating Point Numbers	112
10.6	Characters	113
10.7	Strings	114
10.8	Enumerated Type Scheme	114
10.9	Record Type Scheme	116
10.10	Set Type Scheme	117
10.11	List Type Scheme	120
A	Tutorial	122
A.1	The base language	122
A.1.1	Basic concepts	124

A.2	The module language	145
A.2.1	Basic concepts	148
A.3	An E-LOTOS specification of the ODP trader	156
A.3.1	Introduction	156
A.3.2	An overview of the ODP Trader	156
A.3.3	E-LOTOS Specification of the trader	158
A.3.4	The complete specification	161
B	Guidelines for LOTOS to E-LOTOS translation	179
B.1	Introduction	179
B.1.1	Specification and process definition	180
B.1.2	Basic LOTOS	180
B.1.3	Data Types	181
B.1.4	Full LOTOS	184
