

ISO 1745:1975-02 (E)

Information processing - Basic mode control procedures for data communication systems

Contents		Page
0	Introduction.....	1
0.1	General	1
0.2	Communication phases	2
1	Scope and field of application	2
1.1	General	2
1.2	Assumptions.....	3
2	Definitions of the transmission control characters	3
3	Message formats	4
3.1	General rules.....	4
3.2	Information messages	4
3.3	Forward supervisory sequences	5
3.4	Backward supervisory sequences	5
4	Description of phases	5
4.1	Phase linkage.....	6
4.2	Phase diagrams	8
4.3	Recovery procedures.....	10
5	Description of use of the transmission control characters	13
Annexes (not part of the Standard)		
A	Definitions	16
B	Extensions of transmission control functions using DLE sequences.....	16
C	Alternate positive acknowledgement option	16
