

ISO/IEC 13568 :2002-07 (E)

Information technology_ - Z_ formal specification notation_ - Syntax, type system and semantics

Contents	Page
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Metalanguages	3
5 Conformance	15
6 Z characters	18
7 Lexis	24
8 Concrete syntax	30
9 Characterisation rules	39
10 Annotated syntax	40
11 Prelude	43
12 Syntactic transformation rules	44
13 Type inference rules	55
14 Semantic transformation rules	66
15 Semantic relations	71
Annex A (normative) Mark-ups	79
Annex B (normative) Mathematical toolkit	94
Annex C (normative) Organisation by concrete syntax production	111
Annex D (informative) Tutorial	158
Annex E (informative) Conventions for state-based descriptions	173
Bibliography	175
Index	176

Figures

1	Phases of the definition	16
B.1	Parent relation between sections of the mathematical toolkit	94
D.1	Concrete parse tree of birthday book example	161
D.2	Tree of birthday book example after syntactic transformation	164
D.3	Annotated tree of axiomatic example	165
D.4	Annotated tree of generic example	168
D.5	Annotated tree of chained relation example	172

Tables

1	Syntactic metalanguage	3
2	Parentheses in metalanguage	4
3	Propositional connectives in metalanguage	5
4	Quantifiers in metalanguage	5
5	Abbreviations in quantifications in metalanguage	5
6	Conditional expression in metalanguage	5
7	Propositions about sets in metalanguage	6
8	Basic set operations in metalanguage	6
9	Powerset in metalanguage	7
10	Operations on natural numbers in metalanguage	7
11	Decorations of names in metalanguage	7
12	Tuples and Cartesian products in metalanguage	8
13	Function comprehensions in metalanguage	8
14	Relations in metalanguage	8
15	Proposition about relations in metalanguage	8
16	Functions in metalanguage	9
17	Application in metalanguage	9
18	Sequences in metalanguage	9
19	Disjointness in metalanguage	9
20	Metavariables for phrases	10
21	Metavariables for operator words	11
22	Environments	12
23	Metavariables for environments	12
24	Variables over type universe	12
25	Type relations	12
26	Type sequents	13
27	Semantic universe	14
28	Variables over semantic universe	14
29	Semantic relations	14
30	Semantic idioms	15
31	Operator precedences and associativities	37
