ISO 8571-1:1988-10 (E)

Information processing systems; Open Systems Interconnection; file transfer, access and management; Part 1: General introduction

Contents

Page

0 Introduction 1
1 Scope and field of application 1
2 References 1
3 Reference model definitions 1
4 Service conventions definitions 2
5 FT AM definitions 2
5.1 General 2
5 .2 Architectural 2
5.3 Filestore schema 3
5.4 Filestore access 3
5.5 File structure 3
5.6 Constraint set 3
5.7 Document types 4
6 Abbreviations 4

Section one: FTAM general concepts
7 OSI architectural background 5
8 Nature of the file service 6
8.1 Control of file activity 6
8.2 Asymmetry of the dialogue 6
8.3 External file service and internal file service 6
8.4 Service classes and functional units 7
9 Functions associated with the file service 7
9 .1 Control of actions 7
9.2 Accounting 8
9.3 Concurrency control 8
9.4 Access control 9
9.5 Commitment 10
10 Service providers supporting FTAM 10
10.1 ACSE - application contexts and the FT AM environment 10
10.2 Presentation Service 10
10.3 Session Service 10

Section two: Virtual Filestore - General Concepts
11 Virtual filestore 12
11.1 Need for a filestore modal 12
11.2 Mapping the virtual filestore definition 12
11.3 Form of the virtual filestore 13
11.4 Attribute dynamics 14
11.5 Filestore schema 14
12 File structures 14
12.1 Categories of Structure 14
12.2 File access structure 15
12.3 Presentation structure 15
13 Constraint sets 16
14 Document types 16

Section three: Overview of the file service and file protocol
15 File service 17
15.1 FTA M regime initialization phase 17
15.2 Filestore management phase 17
15.3 File selection phase 17

15.4 File management phase 18
15.5 File open phase 18
15.6 Data access phase 18
15.7 File close phase 18
15.8 File deselection phase 18
15.9 FTAM regime termination phase 18
16 Mechanisms in the file protocol 18
16.1 Protocol state machine 18
16.2 Grouping of protocol data units 18
16.3 Transparency 18
16.4 Checkpoint insertion 19
16.5 Diagnostics and results 19
16.6 Docket handling and non-volatile storage 19
16.7 Error recovery mechanisms 19

Annexes
A Examples of the use of FT AM 20
B Summary of information objects identified in ISO 8571 25

Figures
1 Row of information between RSE and OSI E 5
2 Logical and actual flows of information in file transfer 6
3 Example of the dialogue between file entities 6
4 Structuring a file protocol entity 7
5 Restrietions on the possible actions 8
6 Mapping between real systems and open systems 12
7 Virtual filestore schema 13
8 An example of a file access structure 14
9 Transmission of an unstructured text file 15
10 File service regimes and related primitives 17
11 Sending a file to a remote system 21
12 Remote database access 22
13 Use of FTAM in a LAN fileserver 23
14 File management 24
