

ISO/IEC 18028-3:2005-12 (E)

Information technology - Security techniques - IT network security - Part 3: Securing communications between networks using security gateways

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Abbreviated terms	4
5	Security requirements	5
6	Techniques for security gateways	5
6.1	Packet filtering	5
6.2	Stateful packet inspection	6
6.3	Application proxy	6
6.4	Network Address Translation (NAT)	6
6.5	Content analyzing and filtering	7
7	Security gateway components	7
7.1	Switches	7
7.2	Routers	8
7.3	Application Level Gateway	8
7.4	Security Appliances	8
8	Security Gateway Architectures	8
8.1	Structured approach	9
8.1.1	Packet filter firewall architecture	9
8.1.2	Dual-homed gateway architecture	10
8.1.3	Screened host architecture	11
8.1.4	Screened subnet architecture	12
8.2	Staged approach	13
8.2.1	Single and multi-staged security gateway architecture	14
9	Guidelines for selection and configuration	16
9.1	Selection of a security gateway architecture and appropriate components	17
9.2	Hardware and software platform	17
9.3	Configuration	17
9.4	Security features and settings	18
9.5	Administration	19
9.6	Logging	19
9.7	Documentation	20
9.8	Audit	20
9.9	Training and education	20
9.10	Miscellaneous	20
