ISO/IEC 19794-8:2006-10 (E)

Information technology - Biometric data interchange formats - Part 8: Finger pattern skeletal data

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Conformance 1

3 Normative references 1

4 Terms and definitions 1

5 Abbreviated terms 5

6 Determination of finger pattern skeletal data 5
6.1 Minutia 5
6.2 Encoding the skeleton ridge line by a direction code 8
6.3 Skeleton line neighbourhood index 13

7 Finger pattern skeletal data record format 14
7.1 Introduction 14
7.2 Record organization 14
7.3 Record header 14
7.4 Single finger record format 16
7.5 Extended data 18
7.5.1 Common extended data fields 18
7.5.2 Ridge count data format 19
7.5.3 Core and delta data format 21
7.5.4 Zonal quality data 23
7.5.5 Sweat pore position data 24
7.5.6 Finger pattern skeleton structural data 25
7.6 Pattern record format summary 26

8 Finger pattern skeletal data card format 28
8.1 Normal size finger pattern skeletal format 28
8.2 Compact size finger pattern skeletal format 28
8.3 Finger pattern skeletal data block 29
8.4 The x or y coordinate extension for compact card format 29
8.5 Usage of additional features for the card format 30
8.6 Comparison parameters and card capabilities 30
8.7 Pattern card format summary 31

9 CBEFF format owner and format types 32

Annex A (informative) Examples for finger pattern skeletal data 33

A.1 Virtual continuation 34
A.2 High resolution mode 35
A.3 Bifurcation 36
A.4 Skeleton line neighbourhood index 37
A.5 Quality map 39

Annex B (informative) Example data record 40

B.1 Data 40
B.2 Example data format diagrams 42
B.3 Raw data for the finger pattern skeletal record format 43
B.4 Raw data for the compact size finger pattern skeletal card format 43

Bibliography 44
