Document management - Analysis, selection and implementation of electronic document management systems (EDMS)

Contents		Page
Foreword		iv
1 Scope	1	1
2 Normative references		1
3 Terms, definitions and abbreviated terms		1
3.1 Terms and definitions		1
3.2 Abbreviated terms		1
4 Electronic document management technologies		3
4.1 General		3
4.2 Database services		4
4.3 EDMS application services		4
4.4 Core technologies and application specific modules		4
4.5 Document imaging technologies		4
4.6 Document or library services technologies		5
4.7 Workflow technologies		6
4.8 ERM technologies		7
4.9 Forms processing		8
4.10 Optical and intelligent character recognition		8
4.11 Records management applications		8
5 EDMS guidelines and standards		9
5.1 General considerations		9
5.2 Trusted EDMS technologies		9
5.3 Industry guidelines		10
5.4 Document imaging		14
5.5 Document/library services		18
5.6 Workflow		19
5.7 COLD/ERM		23
6 Best practices associated with EDMS project phases/activities		23
6.1 General		23
6.2 Process/procedure baselining		23
6.3 Anticipated processes/procedures		26
6.4 Technology requirements definition		26
6.5 Document classification and indexing model		26
6.6 Business objectives and requirements		27
6.7 Technology evaluation guidelines		29
6.8 Forms review and design considerations		30
6.9 Legacy data/document conversion methodology considerations		31
6.10 Procurement document preparation		32
6.11 Solution/product evaluation guidelines		32
6.12 Project planning and execution		34
6.13 System, unit testing, and project monitoring		34
6.14 Acceptance testing criteria		35
6.15 Rollout planning		36
6.16 Business practices documentation		36
6.17 EDMS project activities best practices		36

Annex A (informative) Guidelines and standards	37
Annex B (informative) Summary listing of industry best practices associated with EDMS Project phases/activities	40
Bibliography	41
