Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Symbols, abbreviations and other conventions 15

5 Objectives and identification 16
5.1 Objectives of interoperability and mapping 16
5.2 Identifying the elements to be mapped 16

6 Structural models for mapping across vocabularies 16
6.1 General 16
6.2 Model 1: Structural unity 17
6.3 Model 2: Direct-linked 17
6.4 Model 3: Hub structure 17
6.5 Selective mapping 19
6.6 Choosing among the options 20

7 Types of mapping 20
7.1 General 20

8 Equivalence mappings 21
8.1 General 21
8.2 Simple equivalence 21
8.3 Compound equivalence 22

9 Hierarchical mappings 25

10 Associative mappings 25

11 Exact, inexact and partial equivalence 26
11.1 General 26
11.2 Exact equivalence 26
11.3 Inexact equivalence 27
11.4 Partial equivalence 27

12 Use of mappings in information retrieval 28
12.1 General 28
12.2 Human mediation 28
12.3 Examples of mapping implementation 29
12.4 Conclusions and recommendations 30

13 Handling pre-coordination 31
13.1 General 31
13.2 Mapping between a thesaurus and a scheme with context-dependent captions 32

13.3 Mapping more complex classes ... 37

14 Techniques for identifying candidate mappings ... 38
14.1 General procedure ... 38
14.2 Computer assisted direct matching ... 40
14.3 Co-occurrence mapping ... 40
14.4 Other methods ... 40

15 Managing the data ... 41
15.1 Types of data to be recorded ... 41
15.2 Storing the data ... 43
15.3 Maintaining the mappings data ... 43

16 Display of mapped vocabularies ... 45
16.1 General ... 45
16.2 Single record display ... 46
16.3 Complete displays based on one of the vocabularies ... 48
16.4 Crosswalks ... 49

17 Classification schemes ... 50
17.1 Key characteristics and background ... 50
17.2 Semantic components and relationships compared with thesaurus components ... 53
17.3 Recommendations for mapping between a thesaurus and a classification scheme ... 55

18 Classification schemes used for records management ... 56
18.1 Key characteristics and background ... 56
18.2 Semantic components and relationships compared with thesaurus components ... 57
18.3 Recommendations for interoperability with a thesaurus ... 58

19 Taxonomies ... 59
19.1 Key characteristics and background ... 59
19.2 Types of taxonomies ... 60
19.3 Semantic components and relationships ... 61
19.4 Mapping between a thesaurus and a taxonomy ... 63

20 Subject heading schemes ... 67
20.1 Key characteristics and background ... 67
20.2 Semantic components and relationships ... 68
20.3 Mapping subject headings to and from thesaurus concepts ... 69

21 Ontologies ... 72
21.1 Key characteristics and background ... 72
21.2 Semantic components and relationships ... 73
21.3 Structural comparison between thesauri and ontologies ... 76
21.4 Interoperability with thesauri ... 77

22 Terminologies ... 78
22.1 Key characteristics and background ... 78
22.2 Semantic components and relationships compared with those of a thesaurus ... 79
22.3 Interoperability with thesauri ... 81

23 Name authority lists ... 81
23.1 Key characteristics and background ... 81
23.2 Semantic components and relationships ... 83
23.3 Mapping between a thesaurus and a name authority list ... 85

24 Synonym rings ... 87
24.1 Key characteristics and background ... 87
24.2 Semantic components and relationships ... 88
24.3 Interoperability with thesauri ... 89

Annex A (informative) Management of terminological data in support of interoperability ... 90

Bibliography ... 93

Index ... 96
