

ISO/TR 22957:2018-12 (E)

Document management - Analysis, selection and implementation of enterprise content management (ECM) systems

	Contents	Page
Foreword		v
Introduction		vi
1 Scope		1
2 Normative references		1
3 Terms and definitions		1
4 ECM technology		3
4.1 General		3
4.2 Functional view of ECM systems		3
4.3 Technical view of ECM systems		4
4.3.1 Overview		4
4.3.2 Database services		5
4.3.3 Storage device drivers		5
4.3.4 ECM application services		5
4.4 Core technologies and application-specific modules		6
4.4.1 Overview		6
4.4.2 Document/library services technologies		6
4.4.3 Document imaging technologies		7
4.4.4 Intelligent document recognition		8
4.4.5 Workflow technologies		9
4.4.6 Records management modules		9
4.4.7 Enterprise report management technologies		10
4.4.8 Forms processing		11
4.4.9 Optical, mark and intelligent character recognition		11
5 ECM guidelines and standards		12
5.1 General		12
5.2 Selecting the appropriate guideline or standard		13
5.2.1 General		13
5.2.2 Industry guidelines		13
5.2.3 Trusted system and legal considerations		13
5.2.4 Technology standards		15
5.2.5 Implementation considerations		15
5.3 Document imaging		17
5.3.1 User guidelines		17
5.3.2 Implementation considerations		20
5.4 Document/library services		23
5.4.1 Technology standards		23
5.4.2 Implementation considerations		23
5.5 Workflow		24
5.5.1 Technology standards		24
5.5.2 Implementation considerations		25
5.6 Records management		27
5.6.1 Overview		27
5.6.2 Records capture		27
5.6.3 Maintenance/use		28
5.6.4 Final disposition of records		30

6	Considerations for hosted solutions -- Trusted third-party repository requirements	30
6.1	General	30
6.2	Trusted third-party repository services	31
6.3	Requirements of trusted third-party repositories	32
7	Good practices associated with ECM project phases/activities	33
7.1	Assessing the existing records environment	33
7.2	Change management	33
7.2.1	Overview	33
7.2.2	Champion user participation	33
7.2.3	Change management programme	35
7.2.4	Communication	35
7.2.5	Project phases and activities	36
7.3	Process/procedure baselining	42
7.3.1	Overview	42
7.3.2	High-level baseline	42
7.3.3	Detailed process baselining	43
7.3.4	Processing metrics	43
7.4	Anticipated processes/procedures	44
7.5	Technology requirements definition	45
7.6	Document classification and indexing model	45
7.7	Business objectives and requirements	45
7.8	Technology evaluation guidelines	46
7.9	Forms review and design considerations	47
7.10	Legacy data/document conversion methodology considerations	48
7.10.1	General	48
7.10.2	Full back file conversion	48
7.10.3	Partial back file conversion	48
7.10.4	As-needed conversion	48
7.11	Procurement document preparation	49
7.12	Solution/product evaluation guidelines	49
7.13	Project planning and execution	51
7.14	System, unit testing and project monitoring	51
7.15	Acceptance testing criteria	52
7.16	Rollout planning	53
7.17	Business practices documentation	53
	Annex A (informative) Recommended standards and guidelines	55
	Bibliography	59
