Foreword 3

Introduction 4

1 Scope 6

2 Normative references 6

3 Terms and abbreviations 6

4 Communication between vehicle/equipment and board-computer 6
4.1 General 6
4.2 Communication through RS232 7
4.2.1 RS232 interface on vehicle/equipment "Data transmission handler" 7
4.2.2 RS232 interface on "Board-computer" 7
4.2.3 Communication protocol 8

5 Definitions of variables, records and report 12
5.1 General 12
5.2 Variable types 12
5.3 Recommended SLOTs for variable definitions 15
5.4 Definition of variables 18
5.4.1 General 18
5.4.2 General variables 18
5.4.3 General geographic position system variables 20
5.4.4 General vehicle and route variables 21
5.4.5 General road weather and road condition variables 21
5.4.6 Plough / Broom variables 22
5.4.7 Snow blower or cutter variables 23
5.4.8 Spreader / sprayer variables 23
5.4.9 Grass or branch cutting machine variables 26
5.4.10 Sweeper variables 27
5.4.11 Safety post cleaning machine variables 28
5.4.12 Boat plants cutter variables 29
5.5 Definition of records 29
5.5.1 General 29
5.5.2 Time synchronisation record (record code 0) 30
5.5.3 Standard header record (record code 1) 31
5.5.4 Standard footer record (record code 2) 32
5.5.5 Trigger conditions for record code 3 and higher 32
5.5.6 Geographic position data record (record code 3) 33
5.5.7 Vehicle and route data record (record code 4) 34
5.5.8 Weather and road condition data record (record code 5) 35
5.5.9 Snowplough / broom data record (record code 6 / 7) 36
5.5.10 Spreader / sprayer data record (record code 8) 37
5.5.11 Snow blower / cutter data record (record code 9) 39
5.5.12 Grass / branch cutter data record (record code 10) 40
5.5.13 Sweeper data record (record code 11) 42
5.5.14 Safety post cleaning machine data record (record code 12) 43
5.5.15 Boat plants cutter data record (record code 13) 44
5.5.16 Free definable data record (record code 10000 and higher) 44

5.6 Report definition 45
