DIN EN 15429-3:2015-05 (E)

Sweepers - Part 3: Efficiency of particulate matter collection - Testing and Evaluation

Contents

Page

Foreword 3

Introduction 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Test method features 6

5 Technical requirements 7
5.1 Test facility 7
5.2 Test course 8
5.3 Test surface 8
5.4 Kerb 8
5.5 Test material 9
5.6 Test material application 9
5.7 Test material application area 10
5.8 Test material application density 10
5.9 Aerosol dust monitors 10
5.10 Test surface cleaning equipment 11
5.11 Test sweeper 11
5.12 Dust suppression water 11
5.13 Test sweeper speed 12
5.14 Test sweeper conditioning 12
5.15 Test surface and equipment conditioning 12
5.16 Ambient weather conditions 13
5.17 Reference time 13

6 Test method procedures 14
6.1 Test preparation procedures 14
6.2 Procedures prior to test run 14
6.3 Test run procedures 15
6.4 Procedures after test run 16

7 Test run data analysis and calculations 17
7.1 General 17
7.2 Removal efficiency 17
7.3 PM emission rating 18
7.4 Final sweeper test performance results 19

8 Test result reporting 19

Annex A (normative) Test facility 20

Annex B (normative) Test course layout 21

Annex C (normative) Test material data sheet 22

Annex D (normative) Test run events log sheet 23
