

# DIN EN 15429-3:2015-05 (E)

## Sweepers - Part 3: Efficiency of particulate matter collection - Testing and Evaluation

<b>Contents</b>		<b>Page</b>
Foreword .....		3
Introduction .....		4
1	Scope .....	5
2	Normative references .....	5
3	Terms and definitions .....	5
4	Test method features .....	6
5	Technical requirements .....	7
5.1	Test facility .....	7
5.2	Test course .....	8
5.3	Test surface .....	8
5.4	Kerb .....	8
5.5	Test material .....	9
5.6	Test material application .....	9
5.7	Test material application area .....	10
5.8	Test material application density .....	10
5.9	Aerosol dust monitors .....	10
5.10	Test surface cleaning equipment .....	11
5.11	Test sweeper .....	11
5.12	Dust suppression water .....	11
5.13	Test sweeper speed .....	12
5.14	Test sweeper conditioning .....	12
5.15	Test surface and equipment conditioning .....	12
5.16	Ambient weather conditions .....	13
5.17	Reference time .....	13
6	Test method procedures .....	14
6.1	Test preparation procedures .....	14
6.2	Procedures prior to test run .....	14
6.3	Test run procedures .....	15
6.4	Procedures after test run .....	16
7	Test run data analysis and calculations .....	17
7.1	General .....	17
7.2	Removal efficiency .....	17
7.3	PM emission rating .....	18
7.4	Final sweeper test performance results .....	19
8	Test result reporting .....	19
Annex A (normative)	Test facility .....	20
Annex B (normative)	Test course layout .....	21
Annex C (normative)	Test material data sheet .....	22
Annex D (normative)	Test run events log sheet .....	23
