European foreword	4
Introduction.....	5
1 Scope.....	6
1.1 Introduction.....	6
1.2 In scope.....	6
1.3 Out of scope.....	6
2 Normative references.....	7
3 Terms, definitions and abbreviations.....	7
4 Applicability.....	7
5 Fundamentals and concepts for long-term archiving of 3D mechanical CAD information.....	7
5.1 Introduction.....	7
5.2 CAD essential information: dependencies on the CAD methods used.....	9
5.3 Dependency of CAD essential information on use case	10
5.4 Use cases shared by different aerospace communities	11
5.5 Long-term archiving and retrieval of CAD as part of the company risk management	12
5.6 CAD reference model for long-term archiving of design intent.....	13
5.7 Long-term archiving of CAD and the maturity of related technologies.....	15
5.8 Archiving of several files for the same CAD model.....	16
6 Document structure of EN 9300-1XX family	16
6.1 Introduction.....	16
6.2 Link with other EN 9300 parts.....	17
6.2.1 Link between parts EN 9300-1XX for fundamental and concepts.....	17
6.2.2 Relationship/linking between the EN 9300-1XX family.....	17
7 Qualification methods for long term preservation of archived CAD information.....	18
7.1 Introduction.....	18
7.2 Specific qualification processes for long term archiving of CAD models and associated tolerance thresholds.....	19
7.3 Categorization of CAD archived files according to a risk management analysis	20
7.4 Repair in case of identification of errors after retrieval	21
8 Preservation planning of archived CAD information	21
8.1 Introduction.....	21
8.2 Evolution of CAD systems and other related applications (3D viewers).....	22
8.3 Creation of new validation properties and verification rules.....	23
8.4 Evolution of standards and the related relevant recommended practices	23
8.5 Evolution of business requirements.....	23
8.6 Review of the preservation planning policy	23
9 Administration and monitoring	24

10	Definition of archive information packages for CAD data	25
10.1	General.....	25
10.2	Content information	25
10.3	Preservation Description Information (PDI).....	26
10.3.1	Introduction.....	26
10.3.2	Reference information.....	26
10.3.3	Context information	27
10.3.4	Provenance information	27
10.3.5	Fixity information.....	28
10.3.6	Application of PDI data for LTA of 3D CAD	28
10.4	Packaging information	29
10.5	Descriptive information.....	29
Annex A	(informative) The progression of content within CAD systems	31
Annex B	(informative) Template for the table of contents of a part of the family EN 9300-1xx.....	32
Annex C	(information) Considerations for long-term preservation of CAD 3D information	33
Annex D	(informative) Definition of a representative sample of test cases.....	42
Annex E	(informative) Example of performance indicators used to manage longevity of CAD archived information	45
Annex F	(informative) Maturity of the main components for long-term archiving of CAD mechanical information.....	48
Bibliography	49
