

DIN EN 9300-500:2026-01 (E)

Erscheinungsdatum: 2025-12-12

Aerospace series - LOTAR -Long Term Archiving and Retrieval of digital technical product documentation such as requirements, architecture, simulation, and analytical data - Part 500: Fundamentals and Concepts for Long Term Archiving to enable Model-based Systems Engineering; English version prEN 9300-500:2025

European foreword.....	4
Introduction	5
1 Scope.....	7
1.1 In Scope.....	7
1.2 Out of Scope.....	7
2 Normative references.....	8
3 Terms, definitions and abbreviations	8
4 Applicability.....	8
5 Business specifications for archiving and retrieving MBSE entities	8
5.1 MBSE Process and Use Cases.....	8
5.2 MBSE Use Case Examples.....	10
5.2.1 General.....	10
5.2.2 User Viewpoint.....	10
5.2.3 Company Viewpoint	11
5.2.4 Use Case for Requirements Management (P510)	11
5.2.5 Use Case for Verification and Validation (P515)	12
5.2.6 Use Case for Analytical Behaviour Model (P520).....	13
5.2.7 Use Case for System Architecture Descriptions (P530)	14
5.2.8 Use Case for Logical Bill-of-Materials (P540)	15
5.2.9 Use Case for highly integrated and interrelated models (P550)	16
6 Essential MBSE Information and data	17
6.1 General.....	17
6.2 Applying basic EN 9300 principles	18
6.3 Using STEP – Product data representation and exchange.....	20
6.4 Data preservation is justified by business needs	21
6.5 Identification of essential information	21
6.6 Data retention during the Product Lifecycle.....	22
6.7 MBSE data retention milestones.....	23
6.7.1 General.....	23
6.7.2 Identifying mature data	24
6.7.3 Data Maturity Status	25
6.8 Domain Representations for Archival and Retrieval.....	26
6.9 Guidelines for implementing an MBSE archive.....	27
6.9.1 General.....	27
6.9.2 Data preservation planning.....	27
6.9.3 Archiving Configured Baselines.....	27
6.9.4 Process Documentation	28
6.9.5 Essential Data in Relation to Business Scenarios to Be Supported.....	28
7 Verification and Validation (V&V) of MBSE models	29
7.1 Implementing V&V.....	29
7.1.1 General.....	29
7.1.2 V&V Rules for MBSE Information	29
7.1.3 The Application of V&V Rules.....	29

7.2	Verification Rules for Archiving MBSE Information	30
7.2.1	General	30
7.2.2	Content verification	31
7.2.3	Package verification	31
7.2.4	Verification level 1 – Mandatory rules.....	31
7.2.5	Verification level 2 – Mandatory plus optional rules	32
7.3	Validation rules for MBSE Information.....	32
7.3.1	General	32
7.3.2	Levels of Validation.....	33
7.3.3	Validation Level 1 – Mandatory rules.....	33
7.3.4	Validation Level 2 – Mandatory plus optional rules	33
7.4	Verification and validation steps during the MBSE model archiving process.....	34
7.4.1	General	34
7.4.2	Model creation.....	34
7.4.3	Model Archiving.....	35
7.4.4	Model Storage	36
7.4.5	Model Consulting	36
7.4.6	Model Retrieval.....	36
7.4.7	Model Consumption.....	36
8	Preservation planning for archived MBSE information	36
8.1	General	36
8.2	The Model Manifest and Report	37
8.3	The Process Workflow	37
8.3.1	General	37
8.3.2	The Workflow Overview	39
8.3.3	The Process Roles.....	39
8.4	The Model Manifest.....	39
8.4.1	General	39
8.4.2	Manifest Rules.....	40
8.5	The Model Report	40
8.5.1	General	40
8.5.2	Model Report Rules.....	40
8.6	Designating the Credibility and Coherence of MBSE Information	41
8.7	Create an Implementation Package: The Logical Bill-of-Material (LBOM).....	41
8.8	Managing Links to external MBSE Information	42
8.9	Alternative Designs for archiving MBSE information	42
8.10	Identifying risks for long term archiving of MBSE Information	43
9	Evolution of MBSE data standards.....	43
10	Definition of Archive Information Packages for MBSE Data	44
10.1	General	44
10.2	Content Information	44
10.3	Preservation Description Information	45
	Annex A (informative) Model Metadata	47
	Annex B (informative) Model Report	53
	Annex C (informative) Glossary.....	59
	Bibliography	61
