Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Classification 8

5 General requirements 9
5.1 General 9
5.2 Hydraulic system characteristics 9
5.3 Airworthiness requirements 10
5.4 Qualification 10

6 Functional requirements 10
6.1 Hydraulic fluid 10
6.2 PTU pump/motor displacement 10
6.3 PTU pressure 11
6.4 PTU pump pressure 12
6.5 Motor pressure 14
6.6 Case drain pressures 14
6.7 Flows 14
6.8 Leakage 15
6.9 Speed and direction of rotation 16
6.10 Efficiency 18
6.11 Control 18
6.12 Rated temperature 21
6.13 Acoustic noise level 21
6.14 Endurance 21
6.15 Environmental requirements 22

7 Detail design requirements 22
7.1 Dimensionally critical components 22
7.2 Maintainability features 22
7.3 Seals 23
7.4 Lubrication 23
7.5 Balance 23
7.6 System separation/rip-stop 23
7.7 Drive shaft 23
7.8 Self-contained failure 23
7.9 Safety wire sealing 23
7.10 Electro-conductive bonding 23
7.11 Marking 24

8 Strength requirements 24
8.1 Pressure loads 24
8.2 Proof pressures 24
8.3 Burst pressure 25

8.4 Pressure impulse (fatigue) 26
8.5 Pressure and structural load 26
8.6 Port strength 26

9 Construction 26
9.1 Materials 26
9.2 Corrosion protection 27
9.3 Castings 28

10 Installation requirements 28
10.1 Dimensions 28
10.2 Mass 28
10.3 Mounting 28
10.4 Ports 28
11 Maintenance 28
11.1 Maintenance concept 28
11.2 Service life limitations and storage specifications 28
12 Reliability 29
12.1 Equipment compliance 29
12.2 Requirements 29
13 Quality assurance provisions 29
13.1 Responsibility for inspection 29
13.2 Classification of tests 29
13.3 Test stand requirements 29
14 Acceptance tests 30
14.1 General 30
14.2 Examination of the product 30
14.3 Test programme and inspection methods 30
15 Qualification tests 35
15.1 Purpose 35
15.2 Qualification procedure 35
