

DIN EN 16603-70-32:2014-12 (E)

Space engineering - Test and operations procedure language; English version EN 16603-70-32:2014

Contents	Page
Foreword	5
Introduction	6
1 Scope	7
2 Normative references	8
3 Terms, definitions and abbreviated terms	9
3.1 Terms from other standards	9
3.2 Terms specific to the present standard	9
3.3 Abbreviated terms	11
4 Context of the procedure language	12
4.1 Introduction	12
4.1.1 The space system	12
4.1.2 Satellite testing	13
4.1.3 Mission operations	14
4.2 EGSE and mission control system (EMCS)	14
4.2.1 General	14
4.2.2 Space system model	14
5 Requirements to be satisfied by procedures	18
5.1 Procedure structure	18
5.2 Language constructs	19
5.3 Language specification	22
Annex A (informative) The PLUTO language	23
A.1 The structure of a procedure	23
A.1.1 Procedure definition	23
A.1.2 Procedure declaration body	24
A.1.3 Procedure preconditions body	24
A.1.4 Procedure main body	25
A.1.5 Procedure watchdog body	25
A.1.6 Procedure confirmation body	26

A.1.7	Structure of a step.....	26
A.2	The behaviour of a procedure.....	28
A.2.1	Procedure execution flow.....	28
A.2.2	Step execution flow.....	31
A.2.3	Activity execution flow.....	33
A.2.4	Execution in parallel.....	34
A.2.5	Continuation following an “initiate and confirm” statement.....	35
A.3	PLUTO language definition.....	37
A.3.1	Conventions.....	37
A.3.2	Language case sensitivity.....	38
A.3.3	Comments.....	38
A.3.4	Keywords.....	38
A.3.5	Identifiers.....	39
A.3.6	Constants.....	40
A.3.7	Types.....	43
A.3.8	System interfaces.....	44
A.3.9	Language constructs.....	45
A.4	Extended Backus-Naur form (EBNF) representation of PLUTO language constructs.....	103
A.4.1	Conventions.....	103
A.4.2	PLUTO language constructs.....	105
A.5	Index of PLUTO language constructs.....	117
Annex B (informative) Engineering units.....		120
B.1	Introduction.....	120
B.2	Engineering units and symbols.....	120
B.3	Engineering units railroad diagrams.....	126
B.4	EBNF representation of the engineering units.....	129
Annex C (informative) Functions.....		131
C.1	Introduction.....	131
C.2	Mathematical functions.....	131
C.3	Time functions.....	134
C.4	String functions.....	135
Bibliography.....		137
Figures		
Figure 4-1:	Example of space system elements.....	13

Figure 4-2: Example of a space system model	16
Figure A-1 : Example of a procedure and its elements	24
Figure A-2 : Execution states and transitions for a procedure.....	31
Figure A-3 : Execution states and transitions for a step	33
Figure A-4 : Execution states and transitions for an activity	34
Figure A-5 : Confirmation status and continuation action combinations for main body “initiate and confirm” statements	36
Figure A-6 : Confirmation status and continuation action combinations for watchdog “initiate and confirm” statements	36
Figure A-7 : Example railroad diagram	38

Tables

Table A-1 : Predefined types	43
Table A-2 : Activity and step operation requests.....	78
Table A-3 : Reporting data, variable and argument operation requests	78
Table A-4 : Predefined operators.....	97
Table A-5 : Activity and step property requests	101
Table A-6 : Reporting data, variable and argument property requests	102
Table A-7 : Event property requests	102
Table A-8 : EBNF symbols and meanings	104
Table B-1 : Simple engineering units	121
Table B-2 : Acceptable multiple and submultiple of engineering unit	123
Table B-3 : Acceptable multiples of binary engineering units	124
Table B-4 : Standard compound engineering units	124
Table C-1 : Mathematical functions	131
Table C-2 : Time functions	134
Table C-3 : String functions	135
