

DIN EN 16603-70-11:2015-04 (E)

Space engineering - Space segment operability; English version EN 16603-70-11:2015

Table of contents

Foreword	5
Introduction.....	5
1 Scope.....	7
2 Normative references.....	8
3 Terms, definitions and abbreviated terms.....	9
3.1 Terms from other standards.....	9
3.2 Terms specific to the present standard	9
3.3 Abbreviated terms.....	14
3.4 Conventions.....	14
4 General requirements.....	15
4.1 Introduction.....	15
4.2 Observability.....	15
4.3 Commandability.....	15
4.4 Compatibility	16
4.5 Safety and fault tolerance	16
4.6 Flexibility.....	17
4.7 Testability	18
4.8 Deactivation.....	18
5 Detailed requirements.....	19
5.1 Introduction.....	19
5.2 Mission-level.....	19
5.2.1 Security.....	19
5.2.2 Control functions	20
5.2.3 Uplink and downlink	20
5.3 Telemetry	21
5.3.1 Telemetry design	21
5.3.2 Diagnostic mode	23
5.4 Datation and synchronization.....	24
5.5 Telecommanding	25

5.5.1	Telecommand design.....	25
5.5.2	Critical telecommands.....	27
5.5.3	Telecommand transmission and distribution.....	27
5.5.4	Telecommand verification	28
5.6	Configuration management.....	29
5.6.1	Modes	29
5.6.2	On-board configuration handling	30
5.7	On-board autonomy.....	31
5.7.1	Introduction	31
5.7.2	General autonomy.....	31
5.7.3	Autonomy for execution of nominal mission operations	32
5.7.4	Autonomy for mission data management	33
5.7.5	On-board fault management	33
5.8	Requirements specific to the telemetry and telecommand packet utilization standard	38
5.8.1	Application process and service design.....	38
5.8.2	Statistical data reporting.....	39
5.8.3	Memory management	40
5.8.4	Function management	41
5.8.5	On-board operations scheduling	41
5.8.6	On-board monitoring	42
5.8.7	Large data transfer.....	44
5.8.8	Telemetry generation and forwarding	44
5.8.9	On-board storage and retrieval	44
5.8.10	On-board traffic management	46
5.8.11	On-board operations procedures.....	46
5.8.12	Event-to-action coupling.....	47
5.9	Equipment- and subsystem-specific	47
5.9.1	On-board processors and software	47
5.9.2	Power supply and consumption.....	49
5.9.3	Telemetry, tracking and command (TT&C).....	49
5.9.4	Attitude and orbit control	50
5.9.5	Mechanisms.....	50
5.9.6	Thermal control	51
5.9.7	Payload.....	51
Annex A (informative) Mission constants	52	
Annex B (informative) Tailoring guide.....	54	

Bibliography.....75**Tables**

Table 5-1: Mission execution autonomy levels	32
