

# DIN EN 16602-70-28:2015-06 (E)

Space product assurance - Repair and modification of printed circuit board assemblies for space use; English version EN 16602-70-28:2014

---

<b>Content</b>	<b>page</b>
<b>Foreword</b> .....	<b>9</b>
<b>1 Scope</b> .....	<b>10</b>
<b>2 Normative references</b> .....	<b>11</b>
<b>3 Terms, definitions and abbreviated terms</b> .....	<b>12</b>
3.1 Terms from other standards .....	12
3.2 Terms specific to the present standard .....	12
3.3 Abbreviated terms .....	13
<b>4 Requirements</b> .....	<b>14</b>
4.1 Basic requirements.....	14
4.1.1 Hazard, health and safety precautions .....	14
4.1.2 Materials .....	14
4.1.3 Facilities.....	14
4.1.4 General.....	14
4.2 Repairs .....	15
4.2.1 Repair criteria .....	15
4.2.2 Number of repairs.....	15
4.3 Modifications .....	15
4.3.1 Modification criteria.....	15
4.3.2 Number of modifications.....	16
4.4 Rework .....	16
4.4.1 Rework criteria.....	16
4.4.2 Number of reworks .....	16
4.5 Other requirements .....	16
4.6 Removal of conformal coating.....	17
4.6.1 Requirements .....	17
4.6.2 Procedure .....	17
4.6.3 Acceptance criteria.....	17

4.7	Solder joint removal and unclenching .....	18
4.7.1	Procedure .....	18
4.7.2	Acceptance criteria .....	18
4.8	Repair of damaged gold-plated areas .....	18
4.8.1	Requirements .....	18
4.8.2	Procedure .....	18
4.8.3	Acceptance criteria .....	19
4.9	Repair of damaged conductor tracks.....	19
4.9.1	Requirements .....	19
4.9.2	Procedure .....	19
4.9.3	Acceptance criteria .....	20
4.10	Repair of lifted conductors.....	20
4.10.1	Requirements .....	20
4.10.2	Procedure .....	20
4.10.3	Acceptance criteria .....	20
4.11	Repair of lifted terminal areas (pads) .....	21
4.11.1	Requirements .....	21
4.11.2	Procedure .....	21
4.11.3	Acceptance criteria .....	21
4.12	Terminal post replacement .....	21
4.12.1	Requirements .....	21
4.12.2	Procedure .....	21
4.12.3	Acceptance criteria .....	21
4.13	Wire-to-wire joints.....	22
4.13.1	Requirements .....	22
4.13.2	Procedure .....	22
4.13.3	Acceptance criteria .....	22
4.14	Addition of components .....	22
4.14.1	Requirements .....	22
4.14.2	Procedure .....	23
4.14.3	Acceptance criteria .....	23
4.15	Removal and replacement of axial and multi-lead components .....	24
4.15.1	Requirements .....	24
4.15.2	Procedure .....	24
4.15.3	Acceptance criteria .....	24
4.16	Removal and replacement of flat-pack components .....	24
4.16.1	Requirements .....	24
4.16.2	Procedure .....	24

4.16.3	Acceptance criteria .....	25
4.17	Modification of component connections .....	25
4.17.1	Requirements .....	25
4.17.2	Procedure .....	25
4.17.3	Acceptance criteria .....	26
4.18	Cutting of internal track of a multi-layer printed circuit board .....	26
4.18.1	Procedure .....	26
4.18.2	Acceptance criteria .....	26
4.19	Quality assurance .....	26
4.19.1	General .....	26
4.19.2	Data .....	26
4.19.3	Nonconformance .....	27
4.19.4	Calibration .....	27
4.19.5	Traceability .....	27
4.19.6	Operator and inspector training and certification .....	27
<b>Annex A (informative)</b>	<b>Removal of conformal coating .....</b>	<b>28</b>
A.1	Introduction .....	28
A.2	Tools and materials .....	28
A.3	Methods for the removal of conformal coating .....	28
A.3.1	Method for the removal of polyurethane and silicone-type coating .....	28
A.3.2	Method for the removal of epoxy-type coating .....	29
<b>Annex B (informative)</b>	<b>Solder joint removal and unclenching .....</b>	<b>31</b>
B.1	Introduction .....	31
B.2	Tools and materials .....	31
B.3	Methods for solder joint removal and unclenching .....	31
B.3.1	Method for solder extraction with continuous vacuum .....	31
B.3.2	Method for solder extraction using sucker .....	32
B.3.3	Method for hot jet extraction .....	33
B.3.4	Method for the use of wicking braid .....	33
B.3.5	Method for unclenching of leads .....	34
<b>Annex C (informative)</b>	<b>Repair of damaged gold-plated areas .....</b>	<b>35</b>
C.1	Introduction .....	35
C.2	Tools and materials .....	35
C.3	Methods for the repair of damaged gold-plated areas .....	35
C.3.1	Method for the removal of solder splatter on gold plating .....	35
<b>Annex D (informative)</b>	<b>Repair of damaged conductor tracks .....</b>	<b>36</b>
D.1	Introduction .....	36

D.2	Tools and materials .....	36
D.3	Method for the repair of damaged conductor tracks.....	36
<b>Annex E (informative) Repair of lifted conductors .....</b>		<b>37</b>
E.1	Introduction.....	37
E.2	Tools and materials .....	37
E.3	Methods for repair of lifted conductors .....	38
E.3.1	Method for the use of epoxy under conductor .....	38
E.3.2	Method for the use of epoxy over conductor .....	38
<b>Annex F (informative) Repair of lifted terminal areas (pads).....</b>		<b>39</b>
F.1	Introduction.....	39
F.2	Tools and materials .....	40
F.3	Method for the repair of lifted terminal areas (pads).....	40
<b>Annex G (informative) Terminal post replacement.....</b>		<b>41</b>
G.1	Introduction.....	41
G.2	Tools and materials .....	41
G.3	Method for the replacement of terminal post.....	41
<b>Annex H (informative) Wire-to-wire joints .....</b>		<b>43</b>
H.1	Introduction.....	43
H.2	Tools and materials .....	43
H.3	Method for wire-to-wire joining .....	43
<b>Annex I (informative) Addition of components .....</b>		<b>45</b>
I.1	Introduction.....	45
I.2	Tools and materials .....	45
I.3	Methods for addition of components .....	46
I.3.1	Method for additional components mounted on reverse (non-component) side of board.....	46
I.3.2	Method for additional components mounted on component side of board .....	47
I.3.3	Method for additional components mounted on terminal posts, including “piggyback” mounting .....	48
I.3.4	Method for additional components mounted (on reverse side or on component side of board) using staking compound .....	49
I.3.5	Method for additional components mounted (on reverse side or on component side of board) to leads of adjacent components .....	50
I.3.6	Method for the addition of a wire link onto soldered chips on a single side piece of PCB with appropriate pads .....	55
I.3.7	Method for the addition of a wire link onto metallized cap of chips directly glued on PCB .....	56

<b>Annex J (informative) Removal and replacement of axial and multi-lead components .....</b>	<b>57</b>
J.1 Introduction.....	57
J.2 Tools and materials .....	57
J.3 Methods for removal and replacement of axial and multi-lead components .....	57
J.3.1 Method for the removal of components with axial leads (destructive removal) .....	57
J.3.2 Method for the removal of multi-lead components (destructive removal)...	58
<b>Annex K (informative) Removal and replacement of flat-pack components.....</b>	<b>60</b>
K.1 Introduction.....	60
K.2 Tools and materials .....	60
K.3 Method for the removal and replacement of flat-pack components.....	60
<b>Annex L (informative) Modification of component connections .....</b>	<b>62</b>
L.1 Introduction.....	62
L.2 Tools and materials .....	62
L.3 Methods for modification of component connections .....	62
L.3.1 Method for the soldering of a wrap-around connection to an extended component lead .....	62
L.3.2 Method for the soldering of component lead to a stud lead mounted into an existing hole.....	63
L.3.3 Method for mounting a dual-in-line (DIL) package with or without a wire link soldered onto a cropped lead .....	64
L.3.4 Method for mounting a connector with or without a wire link soldered onto a cropped lead.....	66
L.3.5 Method for the addition of a wire link into a plated-through hole occupied by a flat-section lead .....	67
L.3.6 Method for the addition of a wire link on top of a flat-pack lead .....	69
L.3.7 Method for the isolation of a component lead.....	69
L.3.8 Method for the addition of a wire link onto terminal pad of soldered chips.	71
<b>Annex M (informative) Cutting of internal track of a multi-layer printed circuit board .....</b>	<b>73</b>
M.1 Introduction.....	73
M.2 Tools and materials .....	73
M.3 Method for cutting the internal track of a multi-layer printed circuit board .....	73
<b>Bibliography.....</b>	<b>75</b>

## Figures

Figure A-1 : Removal of coating by thermal parting device.....	30
--	----

Figure B-1 : Continuous vacuum solder extraction on stud lead .....	32
Figure B-2 : Pulse-type solder sucker in use.....	32
Figure B-3 : Lifting individual leads with hot jet .....	33
Figure B-4 : Cross-sectional view of wicking method .....	34
Figure B-5 : Hot unclenching with thermal parting device .....	34
Figure E-1 : Lifted conductors .....	37
Figure E-2 : Repair using epoxy under conductor .....	38
Figure E-3 : Repair using epoxy over conductor .....	38
Figure F-1 : Lifted terminal area .....	39
Figure F-2 : Terminal areas without track.....	39
Figure F-3 : Terminal areas with track attached .....	40
Figure G-1 : Terminal post replacement.....	42
Figure H-1 : Use of approved type support clamp/heat sink .....	44
Figure I-1 : Additional components mounted on reverse (non-component) side of board.....	47
Figure I-2 : Additional components mounted on component side of board .....	48
Figure I-3 :“Piggyback” mounting of one component on top of another .....	49
Figure I-4 : Mounting and wiring of additional axially-leaded components mounted (on reverse side or on component side of board) using staking compound.....	51
Figure I-5 : Upside down mounting and wiring of additional side-brazed DIL component (on reverse side or on component side of board) using staking compound.....	52
Figure I-6 : Mounting of additional non-axially leaded components, e.g. capacitors, with wire connecting top or bottom sides of the circuit board using staking compound (on reverse side or on component side of board) .....	52
Figure I-7 : Mounting of additional component (on component side of board) with wire connections on reverse side of board using staking compound .....	53
Figure I-8 : Mounting of additional component (on reverse side of board) across extended leads of adjacent components .....	53
Figure I-9 : Mounting of additional component by linking to a “pigtailed” lead of an adjacent component .....	54
Figure I-10 : Mounting of additional component by linking to lead of an adjacent transistor (or other large component).....	55
Figure I-11 : Addition of a wire link onto metallized cap of chips directly glued on PCB .....	56
Figure J-1 : Removal of multi-lead components, clipping of component leads .....	58
Figure J-2 : Removal of multi-lead components, removal of remaining component leads .....	59
Figure K-1 : Removal of flat-pack components .....	61
Figure L-1 : Soldering of a wrap-around connection to an extended component lead .....	63
Figure L-2 : Soldering of component lead to a stud lead mounted into an existing hole .....	64
Figure L-3 : Mounting a dual-in-line package with or without a wire link soldered onto a cropped lead (cropped lead without connection and cropped lead with connection led through hole and onto board).....	65
Figure L-4 : Mounting a dual-in-line package with or without a wire link soldered onto a cropped lead (wire link passing away from board).....	66

Figure L-5 : Mounting a connector with a wire link soldered onto a cropped lead ..... 67

Figure L-6 : Addition of a wire link into a plated through hole occupied by a flat-section lead  
(wire link entering from the reverse side of the board) ..... 68

Figure L-7 : Addition of a wire link into a plated through hole occupied by a flat-section lead  
(wire link entering from the component side of the board)..... 68

Figure L-8 : Addition of a wire link on top of a flat-pack lead..... 69

Figure L-9 : Isolation of a component lead ..... 71

Figure L-10 : Addition of a wire link onto terminal pad of soldered chips ..... 72

Figure M-1 : Cutting of internal track of a multi-layer circuit board ..... 74

**Tables**

Table 4-1: Wire diameters for given conductor widths ..... 19
