

ISO 19631:2015-09 (E)

Aerospace series - Tube fittings for fluid systems, 5 080 psi (35 000 kPa) - Qualification specification

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Requirements	1
3.1	Qualification	1
3.1.1	Manufacturer qualification	1
3.1.2	Product qualification	2
3.2	Materials	2
3.2.1	Fittings	2
3.2.2	Tubing	2
3.2.3	Testfluid	2
3.3	Environmental conditions	3
3.3.1	Pressures	3
3.3.2	Temperature	3
3.4	Design and manufacture	3
3.4.1	Fluid passages	3
3.5	Performance	3
3.5.1	Specimen preparation	3
3.5.2	Proof pressure	4
3.5.3	Gaseous pressure	4
3.5.4	Hydraulic impulse resistance	4
3.5.5	Ultimate pressure	5
3.5.6	Flexure fatigue resistance	5
3.5.7	Re-use capability	5
3.5.8	Tensile load capability	6
3.5.9	Thermal shock	6
3.5.10	Over-tightening	6
3.5.11	Electrical conductivity	6
3.5.12	Salt spray	7
3.5.13	Vibration	7
3.5.14	Fire test	11
3.5.15	System pressure test	11
3.5.16	Fuel ageing	12
3.5.17	Hydraulic fluid ageing	12
3.5.18	Tube twisting	12
3.5.19	Fitting/tube rotation torque	13
3.5.20	Stress corrosion	14
3.5.21	Lightning strike	16
	Annex A (normative) Equivalent materials and processes	18
	Bibliography	20
