## Space systems - Best practices for orbit elements at payload - LV separation

---

| <b>Contents</b>    |   | <b>Page</b> |
|--------------------|---|-------------|
| Foreword .....     |   | iv          |
| Introduction ..... |   | v           |
| <b>1</b>           | <b>Scope .....</b>  | <b>1</b>    |
| <b>2</b>           | <b>Symbols and abbreviated terms .....</b>                    | <b>1</b>    |
| 2.1                | Abbreviated terms .....                                       | 1           |
| 2.2                | Symbols .....   | 2           |
| <b>3</b>           | <b>Orbit elements and calculation conditions .....</b>        | <b>3</b>    |
| 3.1                | Orbit elements .....  | 3           |
| 3.2                | Data source .....   | 5           |
| 3.2.1              | General .....   | 5           |
| 3.2.2              | Guideline of correction about the external measurements ..... | 5           |
| 3.2.3              | External measurement data accuracy .....                      | 5           |
| 3.3                | Coordinate systems and time systems .....                     | 5           |
| 3.3.1              | Coordinate systems .....                                      | 5           |
| 3.3.2              | Time systems .....  | 7           |
| <b>4</b>           | <b>Calculation method of Keplerian elements .....</b>         | <b>7</b>    |
| 4.1                | Calculation method of orbit elements .....                    | 7           |
| 4.2                | Transformation of other orbit elements .....                  | 9           |
| 4.2.1              | Parameters of orbit size and shape .....                      | 9           |
| 4.2.2              | Parameters of orbit orientation .....                         | 10          |
| 4.2.3              | Parameters of satellite location .....                        | 10          |
| <b>5</b>           | <b>Calculation method of orbit elements error .....</b>       | <b>10</b>   |
| Bibliography ..... |   | 12          |
