ISO 7257:2016-06 (E)

Aircraft - Hydraulic tubing joints and fittings - Rotary flexure test

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Requirements 1
2.1 Flexure test device 1
2.2 Flexure test specimen 1
2.3 Specimen length and deflection requirements 7
2.3.1 Specimen length 7
2.3.2 Stress determination 7
2.3.3 Deflection 7
2.4 Method of classification of fittings according to S/N flexure performance 7
2.5 Method of determining deflection/fatigue strength 7

3 Procedure 8
3.1 Preparation for test 8
3.1.1 Instrumentation, strain gauges 8
3.1.2 Rotary flexure test set-up centring 8
3.1.3 Flexure stress measurement 9
3.1.4 Flexure deflection measurement 9
3.1.5 Operating pressure 9
3.2 S/N testing 9
3.3 Deflection/fatigue testing 10

4 Formula 10

5 Equipment 10
