ISO 18676:2017-11 (E)

Space systems - Guidelines for the management of systems engineering

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Positioning of systems engineering management 2
4.1 General 2
4.2 Need for systems engineering management 3
4.3 Systems engineering 3
4.4 Systems engineering management 4
4.5 Systems engineering management relative to the mission/programme/project 4

5 Management of the systems engineering activities 5
5.1 General 5
5.2 Planning 5
5.3 Assessment 6
5.4 Trade-offs and decision making 6
5.5 Control 6

6 Systems engineering management plan (SEMP) 7

7 Systems engineering management activities 7
7.1 Management of stakeholder requirements analysis 7
7.2 Management of system requirements analysis 7
7.3 Management of architectural design 8
7.4 Management of detailed design 8
7.5 Management of assembly, integration and verification 8
7.6 Management of validation 9

8 Work breakdown structures (WBS) 9

9 Phasing, scheduling and recursivity 10

10 Budgeting and resource planning 10

11 Status reporting and assessment 11
11.1 General 11
11.2 Cost assessments 11
11.3 Scheduling assessments 11
11.4 Performance assessments 12
11.5 Risk assessments 12

12 Reviews, audits and control gates 12
12.1 General 12
12.2 Review 13
12.3 Review list 13
12.4 Audits 14

12.5 Control gates 15

13 Interfaces management with SE 15
13.1 General 15
13.2 Acquisition and supply interface management 15
13.3 Implementation interface management 15
