

# ISO 6858:2017-11 (E)

## Aircraft - Ground support electrical supplies - General requirements

---

<b>Contents</b>		<b>Page</b>
Foreword .....		v
Introduction .....		vi
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Technical basis .....	4
5	Electrical characteristics .....	4
5.1	General .....	4
5.1.1	Overview .....	4
5.1.2	Alternating current (AC) power sources .....	5
5.1.3	Direct current (DC) power sources .....	5
5.2	Interface connector .....	6
5.3	Electromagnetic interference .....	6
5.3.1	Utility interface .....	6
5.3.2	Aircraft interface .....	6
5.4	AC steady-state output characteristics .....	6
5.4.1	General .....	6
5.4.2	Steady-state AC load characteristics .....	6
5.4.3	Steady-state AC voltage performance .....	7
5.5	AC transient characteristics .....	8
5.5.1	General .....	8
5.5.2	Transient AC load characteristics .....	8
5.5.3	Transient AC voltage .....	8
5.5.4	Transient frequency .....	9
5.6	DC steady-state output characteristics .....	9
5.6.1	Steady-state DC load characteristics .....	9
5.6.2	Steady-state voltage .....	9
5.6.3	Voltage ripple .....	9
5.7	DC transient characteristics .....	9
5.7.1	Transient DC load characteristics (other than engine start-related) .....	9
5.7.2	Transient DC voltage .....	9
5.7.3	Engine starting output characteristics .....	10
6	Electrical protection .....	10
6.1	General .....	10
6.2	AC system protection .....	10
6.2.1	Overvoltage .....	10
6.2.2	Undervoltage .....	10
6.2.3	Frequency .....	10
6.2.4	Overcurrent and short circuits .....	10
6.2.5	Phase sequence .....	11
6.2.6	DC content .....	11
6.2.7	Open neutral/phase conductors .....	11
6.2.8	Earth/Ground fault .....	11
6.3	DC system protection .....	11
6.3.1	Overvoltage .....	11

6.3.2	Undervoltage .....	11
6.3.3	Reverse polarity .....	11
6.3.4	Reverse current .....	11
6.3.5	Overcurrent and short circuits .....	12
7	Control circuit and supply .....	12
7.1	Control circuits .....	12
7.2	Aircraft interlock supply for AC facilities .....	12
7.2.1	General .....	12
7.2.2	Interlock signal characteristics .....	12
7.2.3	Maintenance mode .....	12
8	Test requirements .....	12
9	Safety requirements .....	13
9.1	General .....	13
9.2	Mechanical safety features .....	13
9.2.1	Hot temperatures .....	13
9.2.2	Fuel tank .....	13
9.2.3	Exhaust .....	13
9.2.4	Foreign object ingestion .....	13
9.2.5	Control panel .....	13
9.2.6	Ergonomics .....	13
9.2.7	Fire fighting .....	13
9.3	Electrical safety features .....	14
9.3.1	Overload .....	14
9.3.2	Fault conditions .....	14
9.3.3	Trip switch .....	14
9.3.4	Earthing .....	14
9.3.5	Facility with electrical supply .....	14
9.4	Features to safeguard personnel .....	14
9.4.1	General .....	14
9.4.2	Electrical contact .....	14
9.4.3	Anti-arcing protection .....	15
9.4.4	Noise .....	15
9.4.5	Vibration .....	15
10	General design features .....	15
10.1	Environmental conditions .....	15
10.2	Life expectancy .....	15
10.3	Manufacturing, service and support features .....	15
10.3.1	General .....	15
10.3.2	Material, parts and processes .....	15
10.3.3	Moisture and fungus resistance .....	16
10.3.4	Corrosion of metal parts .....	16
10.3.5	Workmanship .....	16
10.3.6	Product enclosures .....	16
10.3.7	Service access for adjustments and repairs .....	16
10.3.8	Interchangeability and replaceability .....	16
11	Installation, operation and maintenance .....	16
12	Labelling .....	17
Annex A (normative) Acceptable test listing for AC facilities .....		26
Annex B (normative) Acceptable test listing for DC facilities .....		32
Bibliography .....		35
