

ISO 16726:2018-05 (E)

Space systems - Human-life activity support systems and equipment integration in space flight - Techno-medical requirements for space vehicle human habitation environments - Requirements for the air quality affected by harmful chemical contaminants

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Symbols and abbreviated terms	3
5	Application of this document in space programs	3
5.1	General	3
5.2	This document applicability	3
5.3	Specific program requirements	3
5.4	Monitoring of the flight program compliance to this document	3
5.5	Verification of program requirements	3
6	Air quality control according to contaminants	3
6.1	General	3
6.2	Substance estimation by toxicological group	6
6.3	Evaluation of toxic contaminants	6
6.4	Requirements for non-metallic materials and their selection for use in manned modules. 6 7 Air quality control according for carbon dioxide	7
8	Air quality control during ground processing for MSC and habitable modules	7
9	Air quality control in emergency situations (caused by emission of large amounts of pollutants)	7
Annex A (normative) Daily rates of human excreted harmful gaseous contaminants		9
Bibliography		10
