DIN 5452-6:2021-02 (E)

Aerospace series - Unmanned Aircraft Systems (UAS) - Part 6: Geodata Management for UTM Systems

Contents

Page

Foreword ... 3

1 Scope ... 4

2 Normative references ... 4

3 Terms and definitions ... 4

4 General requirements ... 5

5 Data sources ... 5
5.1 Sources ... 5
5.1.1 General ... 5
5.1.2 Types of sources ... 6
5.1.3 Collecting methods ... 7

6 Components and data types ... 7
6.1 Components ... 7
6.1.1 General ... 7
6.1.2 Geometry and topology ... 7
6.1.3 Semantics/thematics ... 8
6.1.4 Dynamics ... 8
6.1.5 Metadata ... 8
6.2 Raw data and secondary data ... 8
6.3 Data formats ... 9
6.4 Temporal information ... 9

7 Requirements for geodata ... 9
7.1 Definition of UAS geographical zones ... 9
7.2 Coordinate reference system ... 9
7.2.1 Horizontal reference system ... 9
7.2.2 Vertical reference system ... 9
7.3 Data model ... 10
7.4 Data format ... 11
7.5 Data quality ... 11
7.6 Validation and correction ... 12
7.7 Usability and licensing ... 12
7.8 Availability and reliability ... 12

8 Provision of geodata ... 12
8.1 Interfaces and distribution ... 12
8.2 Visualisation ... 12
8.3 Evidence ... 12

References ... 13
