Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 Software product assurance overview 1
4.1 General 1
4.2 Product assurance activities related to software engineering 2
4.3 Product assurance activities related to software safety and security 2
4.4 Product assurance activities related to software reliability 2

5 Software product assurance management 2
5.1 General 2
5.2 Software product assurance planning and control 3
5.3 Risk management 3
5.4 Supplier selection and monitoring 3
5.5 Procurement process 3
5.6 Tools and support environment 4
5.7 Assessment and improvement process 4

6 Software process assurance 4
6.1 General 4
6.2 Software product assurance related to software engineering processes 4
6.2.1 General 4
6.2.2 System requirements analysis process 4
6.2.3 Software requirement analysis process 5
6.2.4 Software architectural design process 5
6.2.5 Software detailed design process 5
6.2.6 Software construction process 5
6.2.7 Software testing process 5
6.2.8 Delivery and acceptance process 6
6.2.9 Operations process 6
6.2.10 Maintenance process 6
6.3 Software product assurance related to support process 6
6.3.1 General 6
6.3.2 Documentation process 7
6.3.3 Safety and security analysis process 7
6.3.4 Critical items handling process 7
6.3.5 Configuration management process 7
6.3.6 Metric process 7
6.3.7 Verification process 8
6.3.8 Validation process 8
6.3.9 Review process 8
6.3.10 Audit process 8
6.3.11 Problem resolution process 8
6.4 Software product assurance related to organizational process 9
6.4.1 General 9

6.4.2 Software product assurance related to management process 9
6.4.3 Infrastructure process 9
6.4.4 Training process 9
6.4.5 Reuse process 9
6.4.6 Automatic code generation evaluation process 10
6.4.7 Model-based software engineering process 10

7 Software product quality assurance 10
