

ISO 22893:2022-04 (E)

Space systems - Software product assurance (SPA)

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	Software product assurance overview	1
4.1	General	1
4.2	Product assurance activities related to software engineering	2
4.3	Product assurance activities related to software safety and security	2
4.4	Product assurance activities related to software reliability	2
5	Software product assurance management	2
5.1	General	2
5.2	Software product assurance planning and control	3
5.3	Risk management	3
5.4	Supplier selection and monitoring	3
5.5	Procurement process	3
5.6	Tools and support environment	4
5.7	Assessment and improvement process	4
6	Software process assurance	4
6.1	General	4
6.2	Software product assurance related to software engineering processes	4
6.2.1	General	4
6.2.2	System requirements analysis process	4
6.2.3	Software requirement analysis process	5
6.2.4	Software architectural design process	5
6.2.5	Software detailed design process	5
6.2.6	Software construction process	5
6.2.7	Software testing process	5
6.2.8	Delivery and acceptance process	6
6.2.9	Operations process	6
6.2.10	Maintenance process	6
6.3	Software product assurance related to support process	6
6.3.1	General	6
6.3.2	Documentation process	7
6.3.3	Safety and security analysis process	7
6.3.4	Critical items handling process	7
6.3.5	Configuration management process	7
6.3.6	Metric process	7
6.3.7	Verification process	8
6.3.8	Validation process	8
6.3.9	Review process	8
6.3.10	Audit process	8
6.3.11	Problem resolution process	8
6.4	Software product assurance related to organizational process	9
6.4.1	General	9

6.4.2	Software product assurance related to management process	9
6.4.3	Infrastructure process	9
6.4.4	Training process	9
6.4.5	Reuse process	9
6.4.6	Automatic code generation evaluation process	10
6.4.7	Model-based software engineering process	10
7	Software product quality assurance	10
	Bibliography	11
