

ISO 24071:2022-08 (E)

Aircraft - Auto-transformer rectifier units (ATRU) - General requirements

Contents		Page
Foreword		v
Introduction		vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	1
4	General requirements	1
4.1	Specification sheets	1
4.2	Materials	1
4.2.1	Selection of materials	1
4.2.2	Metal materials	1
4.2.3	Non-metal materials	2
4.3	Design and construction	2
4.3.1	General mechanical and electrical design	2
4.3.2	Electrical design	2
4.3.3	Mechanical design	3
4.4	Size and mass	4
4.5	Colour	4
4.6	Processing quality and appearance quality	4
4.6.1	Processing quality	4
4.6.2	Appearance quality	4
4.7	Markings	4
4.7.1	Components and parts	4
4.7.2	Nameplate of ATRUs	4
4.8	Performance	5
4.8.1	Input power	5
4.8.2	Output power	5
4.8.3	Efficiency	7
4.8.4	Overload	7
4.8.5	Short circuit	7
4.8.6	Soft starting	7
4.8.7	Insulation resistance and dielectric strength	8
4.8.8	Influence on the input power system	8
4.8.9	Electrical protection	8
4.9	Acoustical noise	8
4.10	Reliability	8
4.11	Maintainability	8
4.12	Interchangeability	9
5	Environmental conditions and test procedures	9
6	Qualification inspection	10
6.1	General	10
6.2	Methods of inspection	10
6.2.1	Processing quality and appearance quality	10
6.2.2	Colour	11
6.2.3	Markings	11
6.2.4	Size and mass	11

6.2.5	Insulation resistance and dielectric strength	11
6.2.6	Normal steady-state input voltage	11
6.2.7	Abnormal steady-state input voltage	11
6.2.8	Input voltage spikes	12
6.2.9	Input power interruptions	12
6.2.10	Input frequency transients	12
6.2.11	Output voltage ripple	12
6.2.12	Output voltage frequency characteristics	12
6.2.13	Output voltage distortion factor	12
6.2.14	Output voltage transients	12
6.2.15	Output power interruptions	13
6.2.16	Efficiency	13
6.2.17	Overload	13
6.2.18	Short circuit	13
6.2.19	Soft starting	13
6.2.20	Influence on the input power system	13
6.2.21	Electrical protection	13
6.2.22	Acoustical noise	13
6.2.23	Reliability	13
6.2.24	Maintainability	14
6.2.25	Interchangeability	14
