European Foreword 7

Introduction 9

1 Scope 10

2 Normative references 11

3 Terms, definitions and abbreviated terms 12

3.1 Terms from other standards 12

3.2 Terms specific to the present standard 13

3.3 Abbreviated terms 15

4 Requirements 17

4.1 General system requirements 17

4.2 Detailed system requirements 17

4.2.1 Overview 17

4.2.2 EMC with the launch system 17

4.2.3 Lightning environment 18

4.2.4 Spacecraft charging and effects 18

4.2.5 Spacecraft DC magnetic emission 19

4.2.6 Radiofrequency compatibility 19

4.2.7 Hazards of electromagnetic radiation 20

4.2.8 Intrasystem EMC 20

4.2.9 EMC with ground equipment 20

4.2.10 Grounding 21

4.2.11 Electrical bonding requirements 21

4.2.12 Shielding (except wires and cables) 23

4.2.13 Wiring (including wires and cables shielding) 23

5 Verification 25

5.1 Overview 25

5.1.1 Introduction 25

5.1.2 Electromagnetic effects verification plan 25

5.1.3 Electromagnetic effects verification report 25

5.2 Test conditions 25
5.2.1 Measurement tolerances 25
5.2.2 Test site 26
5.2.3 Ground plane 28
5.2.4 Power source impedance 28
5.2.5 General test precautions 30
5.2.6 EUT test configurations 30
5.2.7 Operation of EUT 33
5.2.8 Use of measurement equipment 34
5.2.9 Emission testing 36
5.2.10 Susceptibility testing 37
5.2.11 Calibration of measuring equipment 39
5.2.12 Power bus voltage 40
5.2.13 Photographic data 40
5.3 System level 40
5.3.1 General 40
5.3.2 Safety margin demonstration for critical or EED circuits 40
5.3.3 EMC with the launch system 41
5.3.4 Lightning 41
5.3.5 Spacecraft and static charging 41
5.3.6 Spacecraft DC magnetic field emission 42
5.3.7 Intra–system electromagnetic compatibility 42
5.3.8 Radiofrequency compatibility 42
5.3.9 Grounding 42
5.3.10 Electrical bonding 42
5.3.11 Wiring and shielding 42
5.4 Equipment and subsystem level test procedures 43
5.4.1 Overview 43
5.4.2 CE, power leads, differential mode, 30 Hz to 100 kHz 43
5.4.3 CE, power and signal leads, 50 kHz to 100 MHz 45
5.4.4 CE, power leads, inrush current 48
5.4.5 DC Magnetic field emission, magnetic moment 51
5.4.6 RE, electric field, 30 MHz to 18 GHz 54
5.4.7 CS, power leads, 30 Hz to 100 kHz 58
5.4.8 CS, bulk cable injection, 50 kHz to 100 MHz 61
5.4.9 CS, power leads, transients 65
5.4.10 RS, magnetic field, 30 Hz to 100 kHz 69

5.4.11 RS, electric field, 30 MHz to 18 GHz 72
5.4.12 Susceptibility to wire-coupled electrostatic discharges (legacy method) 79
5.4.13 Susceptibility to wire-coupled electrostatic discharges (current injection probe method) 84
5.4.14 Susceptibility to electrostatic discharges into the chassis 87
5.4.15 CE, power leads, time domain 90

Annex A (informative) Subsystem and equipment limits 92

A.1 Overview 92
A.2 CE on power leads, differential mode, 30 Hz to 100 MHz 92
A.3 CE on power leads, in-rush currents 94
A.4 CE on power and signal leads, common mode, 50 kHz to 100 MHz 94
A.5 <<deleted>> 95
A.6 DC magnetic field emission 95
A.6.1 General 95
A.6.2 Characterization 95
A.6.3 Limit 96
A.7 RE, low-frequency magnetic field 96
A.8 RE, low-frequency electric field 96
A.9 RE, electric field, 30 MHz to 18 GHz 97
A.10 CS, power leads, differential mode, 30 Hz to 100 kHz 97
A.11 CS, power and signal leads, common mode, 50 kHz to 100 MHz 98
A.12 CS, power leads, short spike transients 99
A.13 RS, magnetic field, 30 Hz to 100 kHz 100
A.14 RS, electric field, 30 MHz to 18 GHz 101
A.15 Susceptibility to wire-coupled electrostatic discharges (legacy method) 102
